Acoustic Panels

Category: Wall panels
Doors
Ceiling
Interior acoustic improvement

Origin: Germany

Comfortable climate for living and learning. Besides meeting all technical requirements, sound-absorbing systems must leave leeway for architectural design. The acoustic elements shown here have a dual function providing good room acoustics and design features. The acoustic panels are available with wooden veneer, printed veneer, or painted surfaces. veneer.

APPLICATIONS

- **CEILING**

Installing our sound absorption systems on ceiling applications for your project will profit you with a wide range of benefits. Our specialized business partner offers many years of experience in the development and manufacturing of acoustic and sound absorption products with a big variety of finishes and materials. Get professional support in selecting and planning the ideal solution for your application.

- **WALL PANELLING**

We can also offer bespoke 3D wall systems designed with different structures, shapes and gradients. After priming, paints in all colours, shades and gradients can be applied. You can choose from a variety of existing reliefs, or you can implement your own ideas.

- **FURNITURE DOOR SETS**

These products come with holes, slats or micro-perforations to choose from an almost limitless range of variations. In addition to top sound absorption characteristics, these products convince through attractive surface finishes on both sides. The doors come with boreholes ready for installation and can be equipped with hardware based on your request.

HOLE FACE PATTERN

Characteristics:

- Manufactured on a per-order basis
- Largest available dimension is 3600 x 1500 mm
- Optional hole diameter
- Distance between the holes fixed along the length (8/16/32/64)
- Distance between the holes varies along the width
- With or without margin; margin width variable

SLAT FACE PATTERN

Characteristics:

- Manufactured on a per-order basis
- Largest available dimension is 3600 x 1400 mm
- Grooves (slats) can also be machined at the right angle
- Edges available in veneer or ABS edgebanding, 0.6 - 3 mm
- Solid wood edgebanding available on request
- Closet doors with hinge and lock boreholes
- Moulded parts available on request

TONGUE-AND-GROOVE

The panels are mounted on an MDF carrier and have a veneer surface covered with holes of 0.5 mm in diameter. These panels are remarkable for their inconspicuous perforation.

SLAT PANELS

The tongue-and-groove slat panels are ideal for quick and continuous installation as well as simple shaping and adapting to architectural situations in the respective building.

Security Products & Systems

Category: Doors
Partitions
Security counters
Pass-through systems

Origin: Germany

Our partnered factory is developing and manufacturing innovative security products and systems for the protection of human life and material assets. Our products are used wherever there are security requirements, such as in banks, public authorities, courts, embassies and in industry all over the world. From classic pass-throughs for banks to bullet, burglar and fire-resistant door and partition wall systems or comply entry systems requiring top-level security. We deliver everything from a single source.

OVERVIEW

- PRODUCTS

Our partnered factory develops and produces security products that are tested and certified in accordance with the latest international security guidelines: Burglar, bullet and fire-resistant. Our security specialists are constantly striving to provide security from a single source, adapted to the customer's wishes and respective security requirements.

- SECURITY TECHNOLOGY

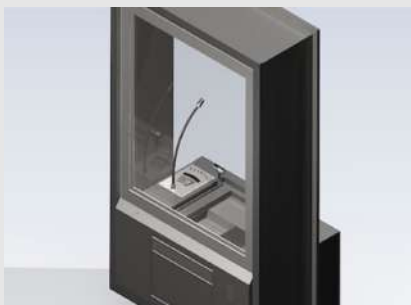

Our partnered factory has been developing and manufacturing innovative security products and systems for the protection of human life and material assets. Our products are used wherever there are security requirements, such as in banks, public authorities, courts, embassies and in industry all over the world. From classic pass-throughs for banks to bullet-, burglar and fire-resistant door and partition wall systems or complete entry systems requiring top-level security, we deliver everything from a single source.

- SECURITY PRODUCTS "Made in Germany"

Our high-quality security systems are continuously optimized and further developed based on current security requirements. They are a combination of top quality "Made in Germany" and sophisticated design. We offer first-class products and excellent service. As a medium-sized, owner-managed company, we are flexible and can also fulfil your special requests. Starting with planning, consulting, construction, manufacturing and installation: The satisfaction of our customers comes first.

- Worldwide

Our safety products and installations can be found all over the world for the protection of human life and material assets. We not only supply individual components such as transfer trays, locks and doors for the security sector - we also construct, manufacture and assemble complete security installations for banks, embassies, consulates, courts and authorities, forensic clinics, data centres and prisons worldwide.

COMPLETE SYSTEMS

We offer complete, ready-to-install counter windows and money transfer systems for a wide range of applications. These complete systems consist of a pass-through system and security pane installed above it in a steel frame together with our Delta 2.0 intercom.

LOCKS FOR PERSONNEL

Our partnered factory produces security interlocks for the controlled access of people into secure areas. For various requirements, our interlocks can be controlled manually by a gatekeeper or equipped with sensors such as metal detectors.

DOORS AND PARTITION WALLS

From planning to production, delivery and assembly, we realize your project. With our profile systems, we can meet all current security requirements such as burglary and bullet resistance or fire protection. We use a profile system for the highest security requirements.

Locker Systems

Category: Airports
Post & package services
Security applications
Cash & cashless systems

Origin: Germany

Mobile pickup stations, transfer systems and delivery stations, with our compact stand-alone locker systems, we want to make the transfer of goods more secure. Delivery and pickup can take place contactless thanks to the transfer stations. Our plug & play systems can be installed indoors and outdoors. Adapted to the current situation, we focus our capacities on such locker solutions and can therefore enable short delivery times.

Our manufacturing partner is one of the leading electronic locker manufacturers worldwide. The company has been developing and producing patented locker solutions for a wide range of applications for over 35 years. More than 50,000 lockers installed in 30 countries speak for themselves.

Full service:

- **PROJECT MANAGEMENT:** We plan, and project manage your locker system right up to networking
- **PRODUCTION:** The locker banks will be manufactured using the latest technology in accordance with your requirements
- **INSTALLATION:** We deliver and install the locker bank and train your employees
- **SERVICE:** Even after delivery, we are happy to help

PUBLIC LOCKERS

For metro stations, airports & public transportation

Your customers are on a trip or an excursion and have time before they continue their journey. Ideal for sitting down in a cosy café, shopping or sightseeing. The only question is, what to do with the heavy and often bulky luggage?

As the operator of smart public lockers, you can answer this question for your customers and offer secure luggage storage with this smart locker system. In addition, travellers and tourists can charge their mobile devices in the lockers.

LEISURE & TOURISM

Lockers for parks, hotels and touristic areas

HEALTH & MEDICINE

Delivery, pickup & handover station for prescriptions and medicine

Your customers have ordered medicine from you but do not have the time to pick them up during your opening hours. You have clients with long-term medication and want to offer them a way to receive the medication without lining up or waiting in the store.

With the compact pick-up station, you can offer your customers a round-the-clock pickup - safe, discreet and flexible.

HEALTH & MEDICINE

Parcel locker, package station and collection point

PUBLIC SECTOR

Lockers for offices, city halls and departments

Do your visitors have heavy luggage or shopping bags with them and do not want to carry these around? Do your customers carry valuables which they want to stow safely?

Our smart lockers allow you to offer your visitors or guests safe and easy storage of their luggage. Additional plus: mobile devices can be charged in the compartments.

LOGISTIC & INDUSTRY

Lockers for internal management and handover of work material

EDUCATION & EVENTS

Lockers for exhibitions, fairs, concerts and schools
