Laminates & Boards

Product Group 1

INTRODUCTION

This is to introduce to you our company GTV Global General Trading L.L.C., an established company since 1998 in the international business hub of the United Arab Emirates which is Dubai.

Our company is specialized in the sales and marketing of high-quality products from leading manufacturers in Europe. With extensive years of experience, we believe that commitment and sincerity in exceeding our customer's expectations will keep our company to the peak of its success.

The main products in this Product Group Laminates & Boards concentrate on surfacing products, starting from high-pressure laminates to unique concrete & metal surfaces, melamine-faced boards, natural wooden veneers, and wooden-based boards.

Through our specific sales divisions categorized in Product Groups as listed here, we specialize in marketing and sales of high-quality products from leading manufacturers.

Product Group 1: Laminates & Boards	
	Chipboards, MDF, Melamine faced boards, HPL
	Edge bands
	Special concrete and metal surface HPL & Boards
	Birch tree Veneer for flooring & wall covering
Product Group 2: Floor & Wall Covering	
	Vinyl Flooring
	Wooden Parquet Flooring
	Wallpaper
	Natural Stone for flooring & wall covering
Product Group 3: Furniture	
	Pillows & Duvets
	Beds & Mattresses
	Sofas & Seaters
	Outdoor Furniture, Chairs, Tables & Loungers
Product Group 4: Fit-Out	
	Glass Partitions, Doors & refrigerated Ceilings
	Acoustic panels
	Security Partitions & Doors
	Lockers & Locker systems
	Internal Doors
	Office meeting & workspace Cubicals

Wood based Panels & HPL

Category: Raw Boards: Chipboard, MDF, HDF
High Pressure Laminates
Melamine Faced Boards
Edge Bands

Origin: Germany, India, China

We offer perfect materials for every project with chipboards and fibreboards, which can be further refined with decorative products, such as laminates, HPL elements or wooden veneer.

UNCOMPROMISED QUALITY & DIVERSITY OF COLLECTIONS

It is rightly said – “first impression lasts”. With our high-quality wood-based materials, we have continued building up on that first great impact from our boards and laminates for many years. We bring to the table a legacy of exceptional artistry, unsurpassed quality and unyielding passion for excellence. We always ensure that superior quality products are available to you, with innovative technology and creative solution as our guiding principles from day one. We provide a diverse portfolio where you can explore solutions that elevate contemporary or traditional styles with stunning visual appeal and craftsmanship that stands up to everyday life.

CHIPBOARDS

Our complete range of raw Chipboards (also commonly called Particle Boards) is efficiently engineered from natural wood. Since we are innately conscious of the environment, our chipboards are entirely conducive to use. Unlike the conventional way where only the bark is of use, here, the whole tree isn't uprooted or destroyed. Bound together with synthetic resin, the plain Chipboards are hot-pressed into wood panels of specific dimensions that are denser and homogeneously structured in comparison to general plywood.

MDF

Medium Density Fiberboards have completely revolutionized the pre-laminated board industry. Frequently shortened to MDF, these Medium Density Fibreboards are extremely popular as a material of choice in high-quality furniture merited of their extensive efficiency, flexibility and serviceability. In addition, MDF is more enduring, with high reliability and long shelf-life. The one-of-a-kind fibre interlocking technology gives MDF high cohesive strength from within, and this keeps it bonded together and gives it rigidity, durability and surface smoothness.

HPL

High Pressure Laminates are made of specially selected decorative papers and absorbent kraft paper impregnated with melamine and phenolic resins. These are then pressed and hardened under heat and high pressure. Our HPL's strong bonding makes them resistant to boiling water and stain and provides increased dimensional stability. Available in over 500 designs, these laminates create an aesthetic look and offer its customers a dynamic range to choose from

MELAMINE FACED BOARDS

Our melamine-faced boards are the wood-based panel of choice for almost all tasks in furniture making and interior finishes. It is made up of decor paper impregnated with melamine resin, which is pressed onto the core by heat and pressure. It is easy to work and thanks to the different core qualities and the variety of decors, it is certain to be suitable for almost any area of use.

ABS, PVC

When designing furniture you can achieve a perfect appearance by selecting a suitable matching edge-banding tape.

Our collection has a wide assortment of various solid colours, wood grain designs, abstract patterns, high gloss and super matte finishes matching the decors of our HPL sheets and melamine boards. Our edge-banding tapes are available in various surface structures, including imitations of solid wood, roughly sawn wood, end grains, textiles, leather, and stone.

Composite Boards

Category: Imitation of Concrete, Rust, and Metal Surfaces
High Pressure Laminates
Wall panelling
Furniture boards

Origin: Germany

We offer architects, interior designers and carpenters surfaces in concrete, rust, old wood, stone, metal and asphalt looks that are very suitable for the design of walls, ceilings, floors or professional furniture and interior design.

APPLICATIONS

- **BOARD FURNITURE CONSTRUCTION**

Original surfaces in concrete, rust, old wood or stone look on MDF, HDF and HPL for furniture construction for the carpenter, all products aim to come as close as possible to the original. A large number of original replicas have already been created. Original materials - with an authentic look and feel. Mineral, through-dyed materials with 3D depth structures, in the case of metal decors with real metal particles in the surface. The different concrete and rust characteristics have no unwinding - every square meter is unique. A uniform appearance is guaranteed, even with large quantities format boards up to 3400 x 1300 mm.

- **FLOOR, WALL, CEILING**

This product group meets the highest standards of sustainability and environmental compatibility. It consists mainly of natural and renewable materials without the addition of chlorine, plasticizers, solvents or other substances of concern. It impresses with its original concrete look and feel, is hard-wearing and extremely durable, yet still flexible, to be glued with 1-component glue. Large format or in plank or tile format. With a 4-sided chamfer or sharp-edged. The right accessories offer solutions for all applications.

- **FACADE**

The facade panel is a high-quality panel material based on basalt stone consisting of a highly compressed rock wool core board and an approx. 1 mm thick mineral coating.

- **OUTDOOR**

With the Outdoor board, we have an extremely robust and resilient product. The composite boards with PUR recycling carrier are non-rotting, mould and rot proof, and the perfect original imitation for exterior applications. As a modern composite material, the Outdoor boards are much lighter and easier to process compared to the original construction materials.

LIGHTWEIGHT CONCRETE

Concrete look and feel with air inclusions give your objects a modern industrial design, the possibilities are endless, available in different sizes, colours and properties. From the flexible version on high-pressure laminate core board to, e.g., the water or fire-resilient version, let your imagination go wild, nearly any design can be achieved.

METALL RUST SURFACES

Rust is suitable not only for furniture and wall covering, thanks to its refined surface it can also be used for floorings. Specifically in contrast with other surfaces such as our concrete or wood, it leads to extraordinary designs of colour and structure that will fascinate you. With its special properties, the metal imitation is much more flexible and easier to use than real iron.

LIGHTWEIGHT METAL

Metal surfaces for immediate processing. Even otherwise, very costly structures are easily and quickly feasible but visually almost indistinguishable from the original. From steel up to copper, verdigris and brass extend the product range. Other structures, individually as well as other metals, are available.

Birch Veneer & Flooring

Category: Raw Boards: Chipboard, MDF, HDF
High Pressure Laminates
Birch Bark
Veneer Flooring

Origin: Germany

Birch bark is a surface material, offering unique designs for furniture, flooring and wall coverings. The surface material is naturally water-repellent and has very high heat and sound-insulating properties, as well as a very good grip when used as flooring in wet rooms.

VENEER

A NEW LOOK AND FEEL THAT GIVES YOU THE SENSE, THAT IT HAS ALWAYS BEEN THERE

Its appealing surface structure and soft texture make the veneer material a new discovery for all those who are looking for something special in product development, interior design and interior decoration. The advantages of the water-repellent and slip-resistant material are immediately apparent, both outdoors and indoors: the consistently velvety feel offers a multitude of possibilities for combining the veneer with other materials as an exciting material accent. Preferably where touch inevitably takes place.

Veneer for furniture and door leaf production:

The veneer can be normally processed for furniture productions used in kitchens, pantries, beds and living rooms, as well it finds its application in veneer for door leaf manufacturing for hotels, high-rise office buildings and villa constructions.

Veneer for wet rooms:

The demand for materials that come from nature - living, healthy materials - is becoming ever greater, even in the spa sector. Its strength in direct contact with water and antimicrobial nature, combined with a natural feel and a pH similar to that of human skin, make the material so attractive for applications in this area.

FLOORING

THE RENEWABLE MATERIAL IS AT ITS BEST WHEN IT COMES IN CONTACT WITH WATER AND HUMAN SKIN

Another plus of the material is that it can also keep up with ceramic tiles in many ways since slipping on the wet surface is prevented by the grip of birch bark. Added to this is its antimicrobial nature, velvety feel and a pH value similar to that of human skin. As a base material for the planks with a seamless look, 100% natural straw boards from high-quality products are used.

Flooring for bathrooms:

For the barefoot area in the bathroom, the birch flooring is ideal due to the natural qualities of birch bark. With a pH similar to that of human skin, it comforts the human skin with every touch.

Flooring for SPA and sauna:

This is how you can feel good! For the skin, the connection with nature is tangible through the warmth, velvety and skin-friendliness of the birch bark. And also the inner values are right: The birch bark is harvested from the living tree and nevi strives for natural cycles all along the line.

Flooring for hotels and hospitality:

Birch flooring not only invites you to linger with its appealing appearance and warm forest tones but a healthy indoor climate is also promoted by the breathable properties of the straw board and the antimicrobial qualities of the birch bark. At the same time, both natural materials are formaldehyde-free.

WHITE NATURE BOARDS

LOOKING AT A DRAWING DESIGNED BY NATURE ITSELF

Every piece of the white nature boards is unique. The typical graphic structure in black and white colour of natural birch bark sets interesting design accents in living spaces, e.g., in hotel and commercial project designs.

Shape & variant:

The birch bark is assembled on wooden fixed boards to use for wall panelling or on flexible plywood for covering columns, for example. The standard size available measures 250 cm in height by 50 cm in width.

Sustainability:

Birch bark is harvested from living trees in Nordic forests and is carefully selected and processed in manufacturing facilities. The gentle and sustainable interaction with nature is noticeable and visible in the end products, the target of this product is to preserve the outer layer of the tree.

The board sizes, thicknesses and styles are variable and available on short notice.
