About GTV Global

GTV Global connects professionals in the UAE and GCC with high-quality, design-driven products from trusted international manufacturers.

Headquartered in Dubai, we work closely with architects, developers, and contractors to supply reliable, innovative solutions tailored to the demands of today's projects.

With a focus on distribution, specification support, and regional expertise, we represent leading brands from Europe, Asia, and the USA. Our team provides end-to-end assistance - from product selection to logistics - ensuring seamless integration into your project timeline.

We don't just supply products - we support your vision with technical knowledge, responsive service, and a curated portfolio that combines performance, sustainability, and design excellence.

Product Divisions

Our offering is built on strategic partnerships and a carefully selected range of products backed by market insight and feasibility. We supply premium solutions across five core divisions:

- Laminates & Boards - Durable, high-performance surfaces for modern interiors.
- Floor & Wall Coverings - Stylish, functional materials that elevate any space.
- Furniture - Elegant, practical designs for residential and commercial use.
- Fit out - Comprehensive products for bespoke interior & architectural needs.
- Windows, Doors & Gates - Precision-engineered for security, energy efficiency, and aesthetics.

Every product we offer meets rigorous quality standards and is chosen to support inspiring, long-lasting design.

Floor & Wall Coverings

We offer a thoughtfully selected range of floor and wall solutions designed to enhance interior comfort and style:

- Acoustic Panels (PET). – Lightweight, sound-absorbing panels for improved acoustics
- Acoustic Panels (Wood). – Stylish wood finishes that reduce noise and add visual warmth
- Vinyl and Wood Flooring. – Durable, high-quality flooring for a variety of interior applications
- Wallpaper. – Elegant wall coverings in diverse textures, effects, and finishes

Perfect for residential, commercial, and hospitality projects, these materials combine aesthetic appeal with practical performance.

Acoustic Panels (PET)

A good solution, with a sustainable character.

Crafted from high-density PET felt, these acoustic panels offer effective sound absorption paired with modern design flexibility, ideal for offices, hospitality spaces, and residential interiors.

Lightweight, durable, and easy to install, they reduce noise while adding a soft, textured finish to walls and ceilings.

Available in a wide range of colors and formats, they provide a practical and visually cohesive solution for creating quieter, more comfortable environments.

Each square meter of panel repurposes approximately 55 recycled PET bottles, making it a stylish, sustainable choice that turns plastic waste into functional design.

PET Gross Panel

PET Denim Panel

PET Design Panel

PET Gross Panel 9mm

- Acoustic Efficiency - PETpanel (9 mm) achieves a NRC of 0.3 on its own.
- Enhanced Sound Absorption - Adding an air cavity or a DENIMpanel behind the 9 mm PETpanel further improves its absorption capabilities.
- Absorption Range - Measured absorption values range between 0 and 1 seconds.
- Certified Testing - All tests comply with the NEN-EN-ISO 354:2003 standard.

PET Denim Panel

- DENIMpanel is an acoustic panel made out of cutting waste of jeans and textiles.
- It is an extra absorber for our standard PETpanel, because of its good acoustic values.
- Because of its fluffy finish, it is not possible to use DENIMpanel as an ending finish.

PET Denim Panel

- Acoustic Performance:

DENIMpanel (20 mm): NRC of 0.5

DENIMpanel (30 mm): NRC of 0.70

DENIMpanel (45 mm): NRC of 0.90

- Application: Must be installed behind PETpanel for optimal performance.
- Testing Standards: All tests conducted in accordance with NEN-EN-ISO 354:2003.

Acoustic Panels (PET)

Acoustic Panels (Wood)

We craft innovative acoustic panels using precision-engineered wood materials that bring warmth, texture, and sound control to any space. Designed to balance aesthetics with function, these panels reduce noise while enhancing the overall ambiance of interiors.

With refined finishes and natural elegance, they transform walls into design features while supporting acoustic performance. Easy to maintain and built for longevity, they provide an ideal solution for both residential and commercial environments.

Experience a new dimension in wall design, where acoustic comfort meets modern interior sensibility.

Ceiling Panels

Wall Panels

Flex Paravent

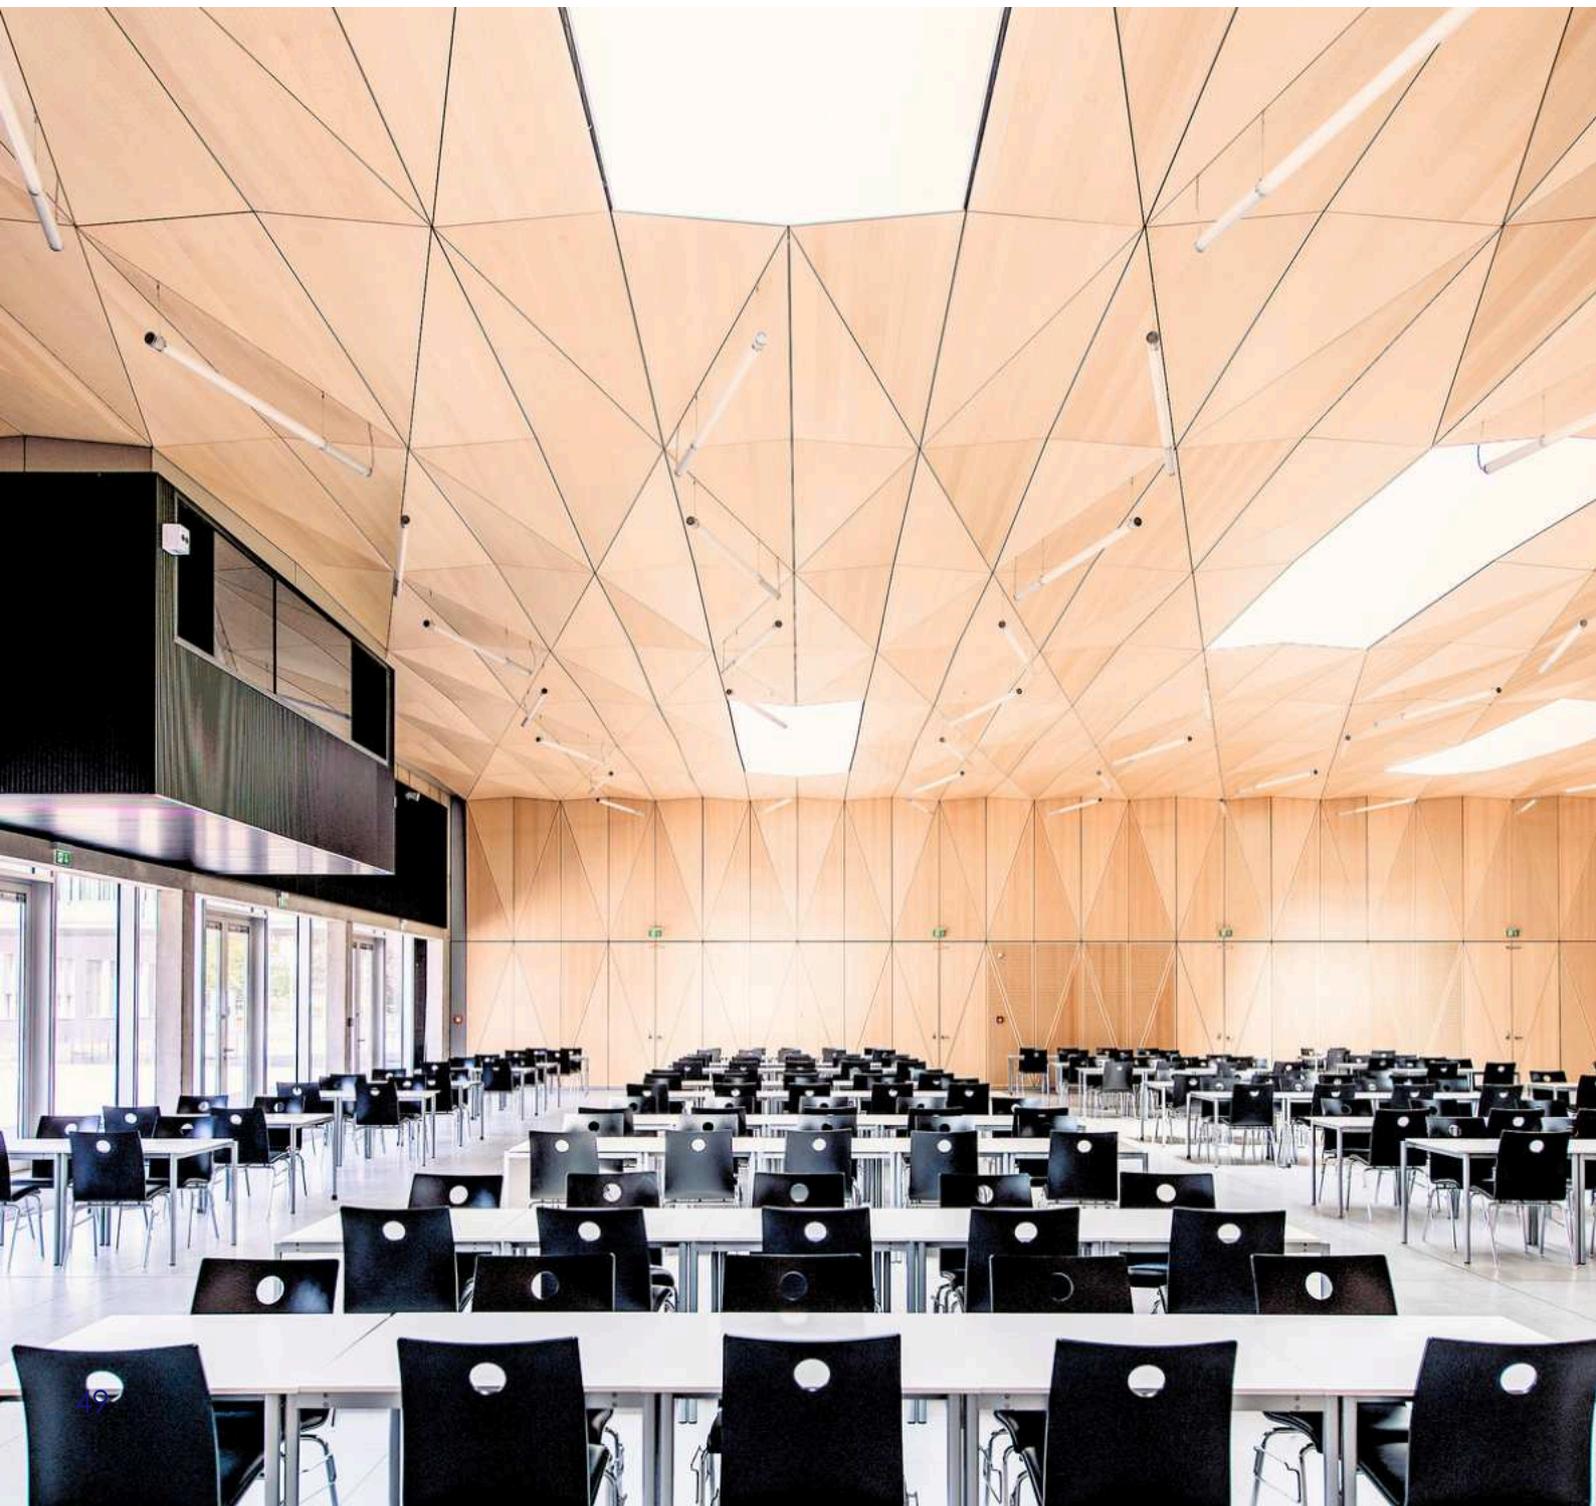

Furniture Doorset

Special Features

Ceiling Panels

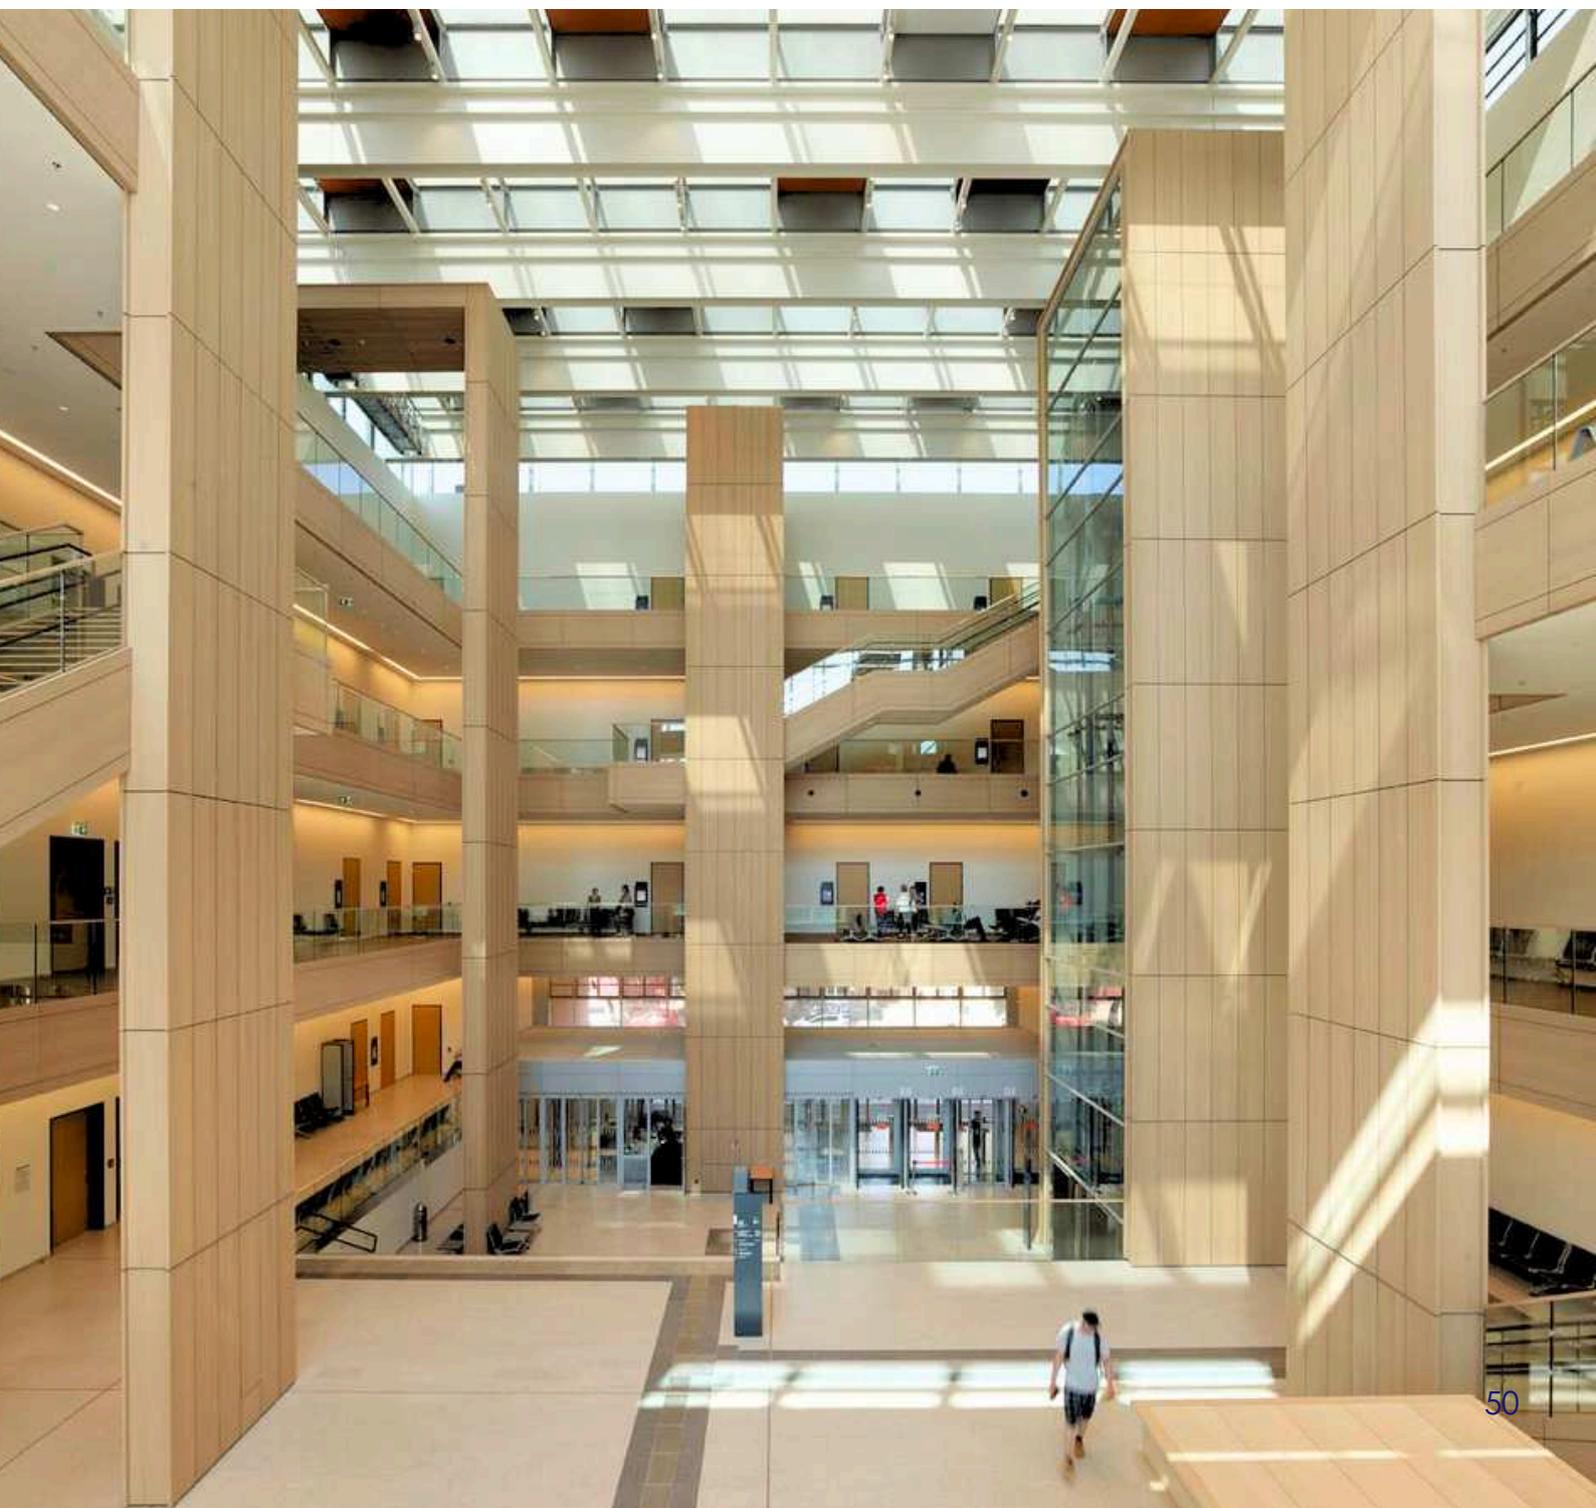

The ceiling panels are precision-crafted from wood or veneered MDF with optional slatted, perforated or tongue-and-groove finishes, designed to absorb sound while providing a refined, architectural look.

Available in custom sizes and finishes - veneer, painted, printed, or raw - they offer both acoustic performance and visual elegance.

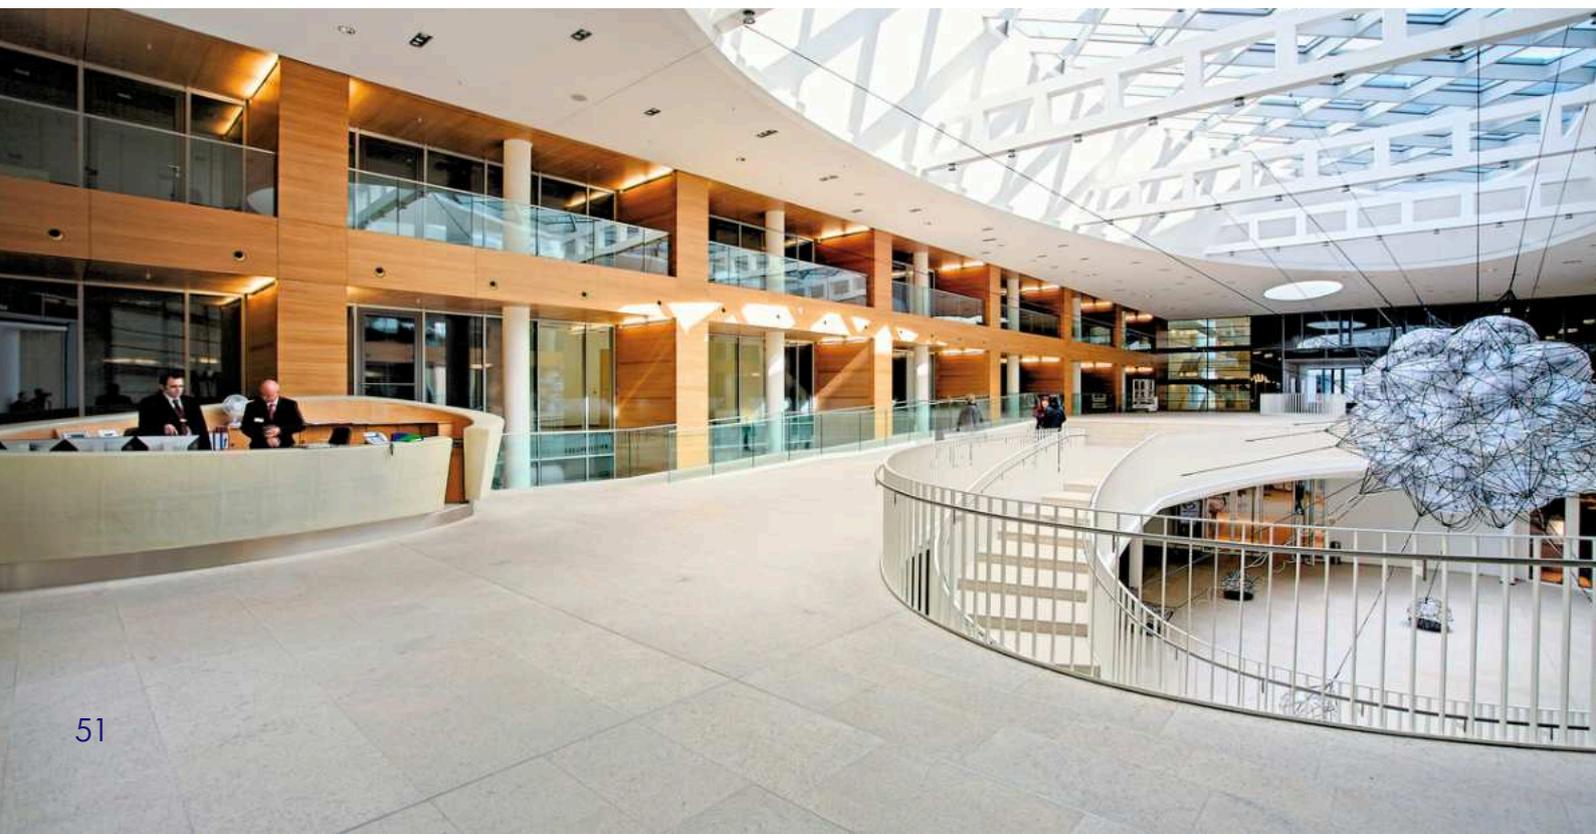

Wall Panels

The wall panels are high-performance acoustic solutions crafted from wood or MDF, available in slatted or perforated designs. They combine precise sound absorption with a refined appearance, suited for sophisticated architectural interiors.

Acoustic Panels (Wood)

Flex Paravent

Our Flex Paravent is a modular acoustic partition system designed to create flexible, sound-absorbing zones within open spaces.

Its lightweight, movable structure allows for easy reconfiguration, making it ideal for offices, lounges, and collaborative environments.

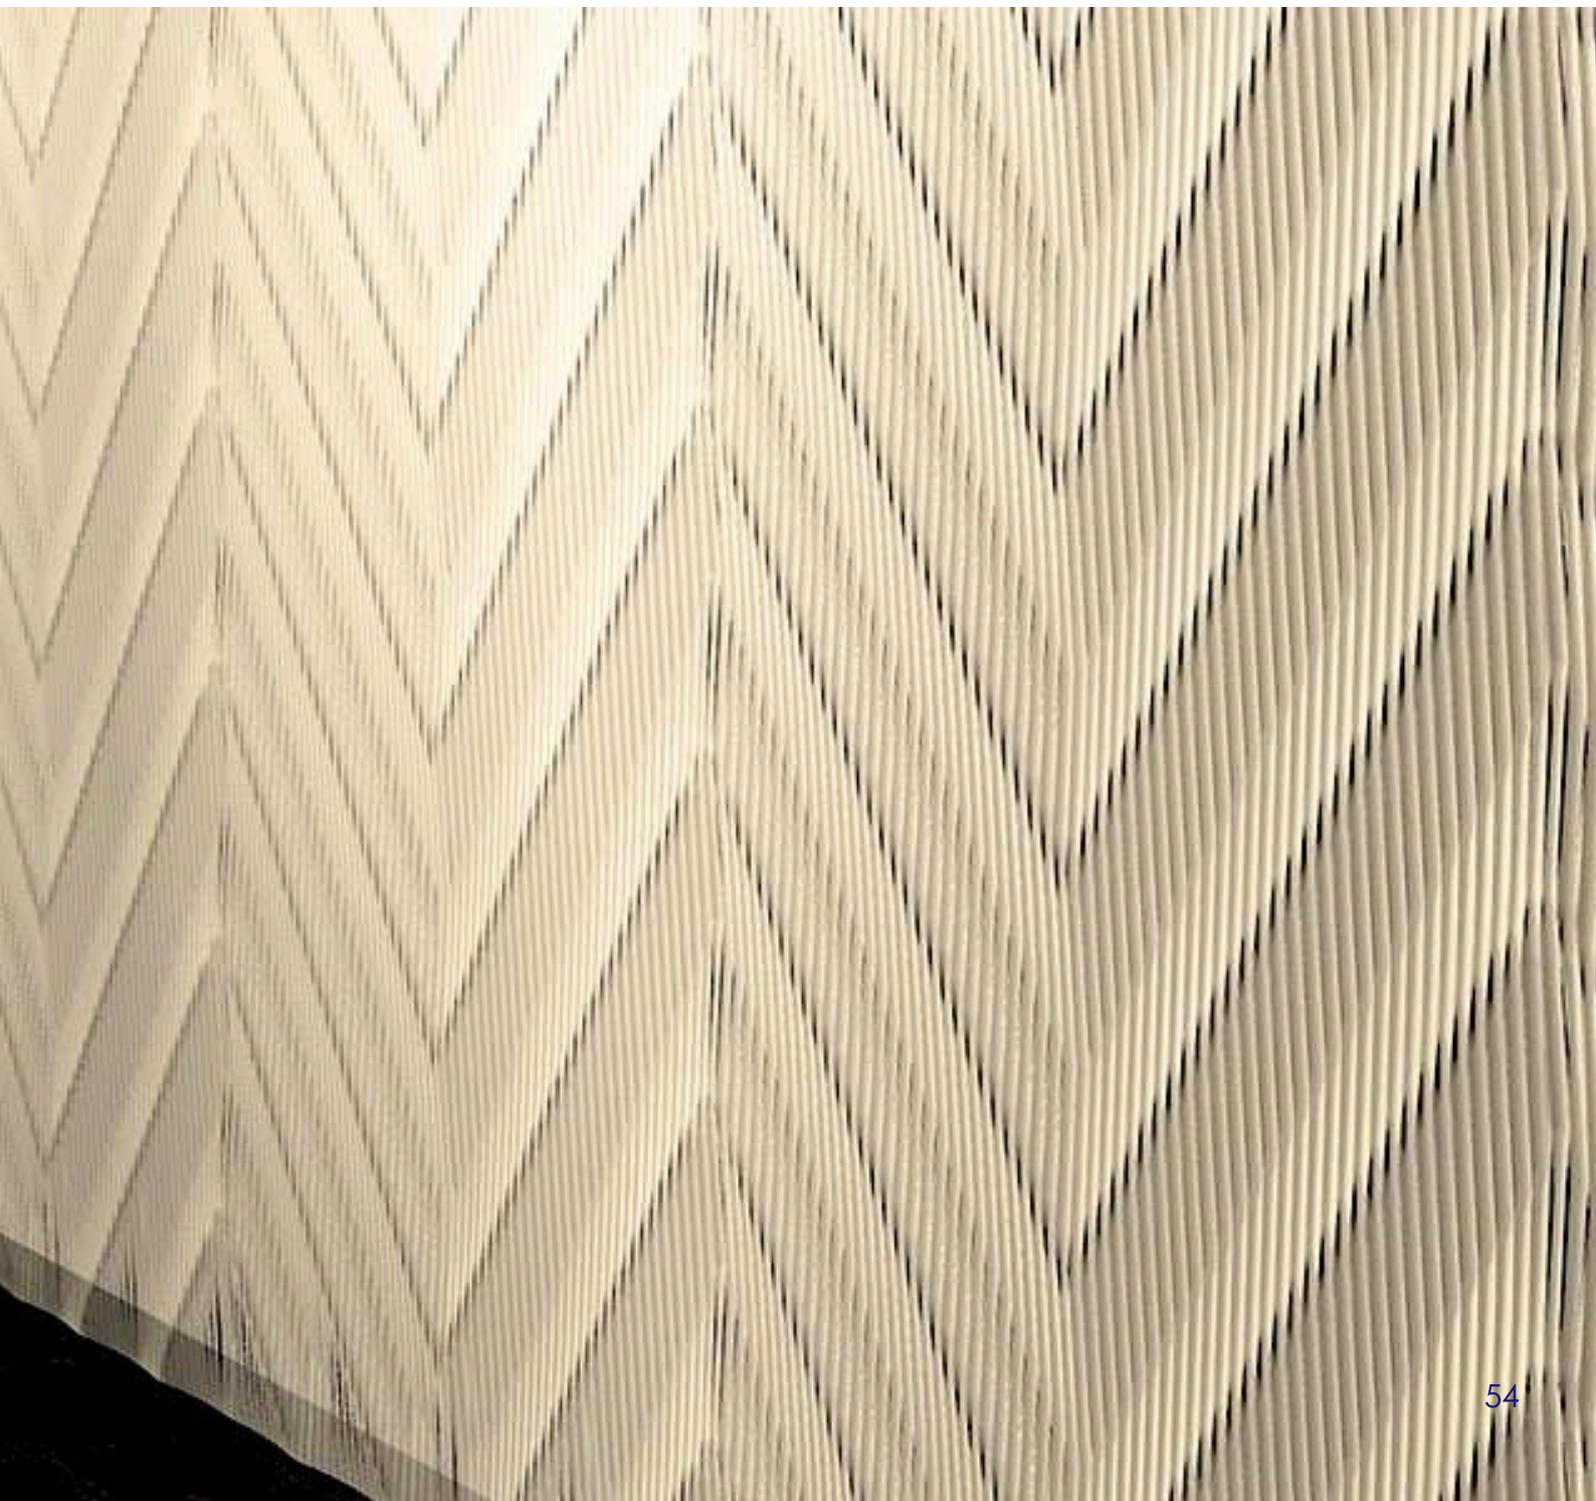

Furniture Doorset

These furniture doorsets are premium acoustic door solution featuring customizable designs - slatted, perforated, or micro-perforated - crafted from high-quality wood or MDF and available with veneer, printed veneer, or painted finishes. Each door delivers excellent sound absorption, is aesthetically finished on both sides, and comes bore-ready for hinges or locks, with optional hardware included for seamless installation

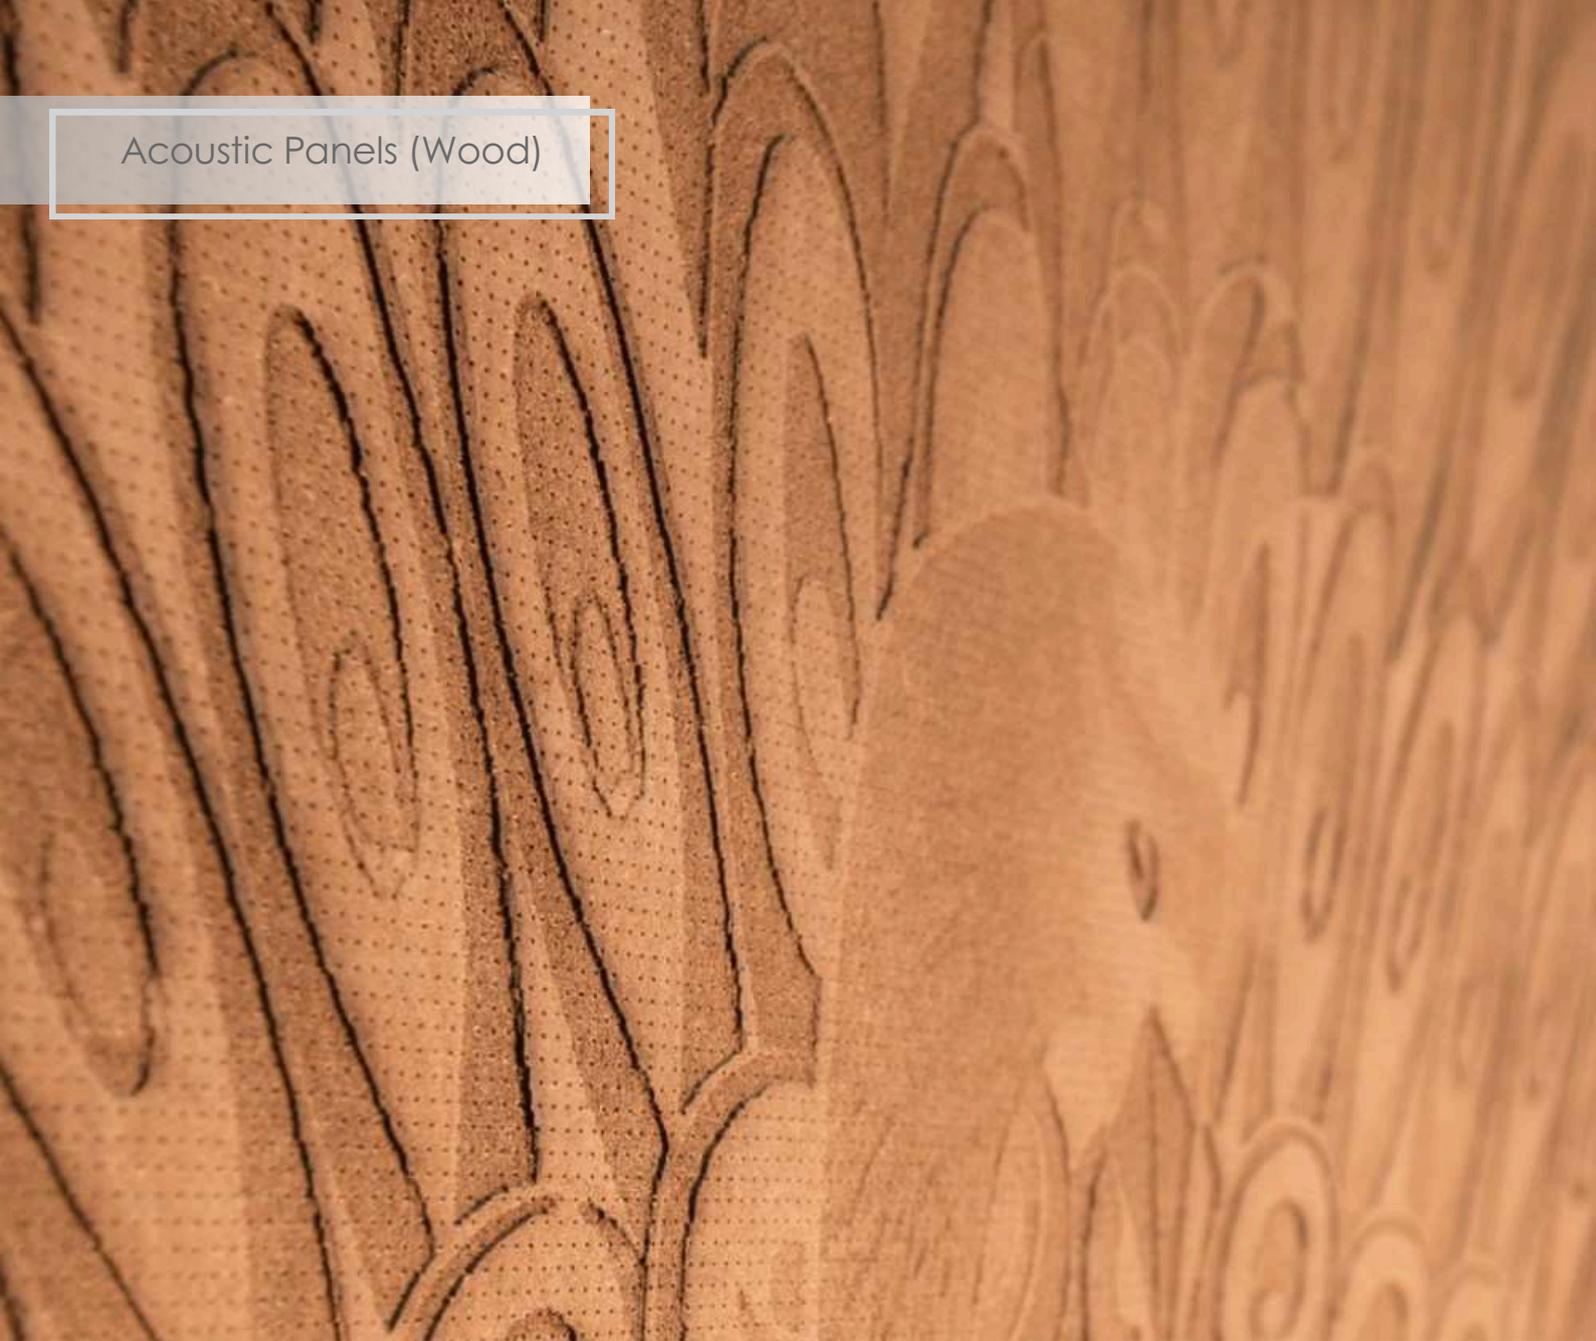

Special Features

The special features include advanced acoustic panel options such as SUBLI-Lite and Nano-Lite, lightweight constructions with excellent sound absorption properties. Panels with slat face patterns and tongue-and-groove slat face patterns offer a modern, linear aesthetic while maintaining high acoustic performance, ideal for custom architectural applications.

Acoustic Panels (Wood)

Special Features: **SUBLI-Lite**

Exact Finishing

- Acoustic collection inspired by unique surfaces and design options.
- Innovative micro-perforated structure for enhanced sound absorption.
- Developed with a German manufacturer using sublimation and laser refinement for a clean finish.
- 19mm MDF panels suited for cabinet fronts, wall, and ceiling cladding.

Special Features: **Nano-Lite**

Elegant Sound Absorption

- Panels mounted on an MDF carrier with a veneer surface and 0.5 mm perforations.
- Excellent sound absorption with inconspicuous perforation.
- Real wood veneer enhances the beauty of the surface.
- Dimensions: 320 cm x 60, 80, or 120 cm (120 cm includes joint); custom sizes available.
- Edgebanding and flame retardant versions (A2, B1, B2) available on request.

Acoustic Panels (Wood)

Special Features: **Panels with Slat Face Pattern**

Exact Finishing

- Made to order.
- Largest available dimension: 3600 x 1400 mm.
- Grooves (slats) can be machined at right angles.
- Edges available in veneer or ABS edgebanding (0.6 - 3 mm).
- Solid wood edgebanding available on request.
- Closet doors with hinge and lock bore holes.
- Molded parts available on request.

Special Features: **Tongue-and-Groove Slat Face Pattern**

Our ALPHA-AKUSTIK® tongue-and-groove slat panels are ideal for quick continuous installation as well as for simple shaping and adapting to architectural situations in the respective building.

Vinyl Flooring

Engineered with precision, our vinyl flooring solutions deliver exceptional performance and comfort underfoot. Suitable for both residential and commercial spaces, these surfaces are built to withstand daily wear while maintaining their refined appearance.

With a natural look and soft tactile feel, the floors offer more than just aesthetics - they're easy to clean, moisture-resistant, and provide excellent sound insulation. The resilient structure ensures long-lasting use while supporting healthier indoor environments through low-emission materials.

Experience flooring that blends durability with design—crafted for contemporary spaces that value both style and practicality.

Parquet Flooring

Crafted from carefully selected wood, our parquet flooring brings warmth, character, and timeless elegance to any interior.

Designed for long-term performance, each piece is engineered to provide exceptional dimensional stability and resistance to daily wear.

The natural grain and texture of the wood are enhanced through precise finishing techniques, offering a surface that is both visually rich and inviting to the touch.

Easy to maintain and sustainably sourced, these floors promote a healthier living environment without compromising on aesthetic value.

Elevate your space with flooring that seamlessly combines authenticity, craftsmanship, and enduring quality.

Skirting

Our skirting solutions combine functionality, durability, and design versatility to create the perfect finishing touch for any floor and wall transition.

Offering a wide range of profiles in hard-foam, PVC, and flexible materials, they ensure seamless installation, reliable protection, and long-lasting aesthetics.

With options for sound reduction, moisture resistance, and even integrated cable management, these skirtings provide both practical performance and stylish detail for modern interiors.

Our Standard

Sustainability

Collection

Our Standard

Our standard is built on precision, quality, and ease of application - ensuring every profile meets the highest requirements for modern building projects.

Collections:

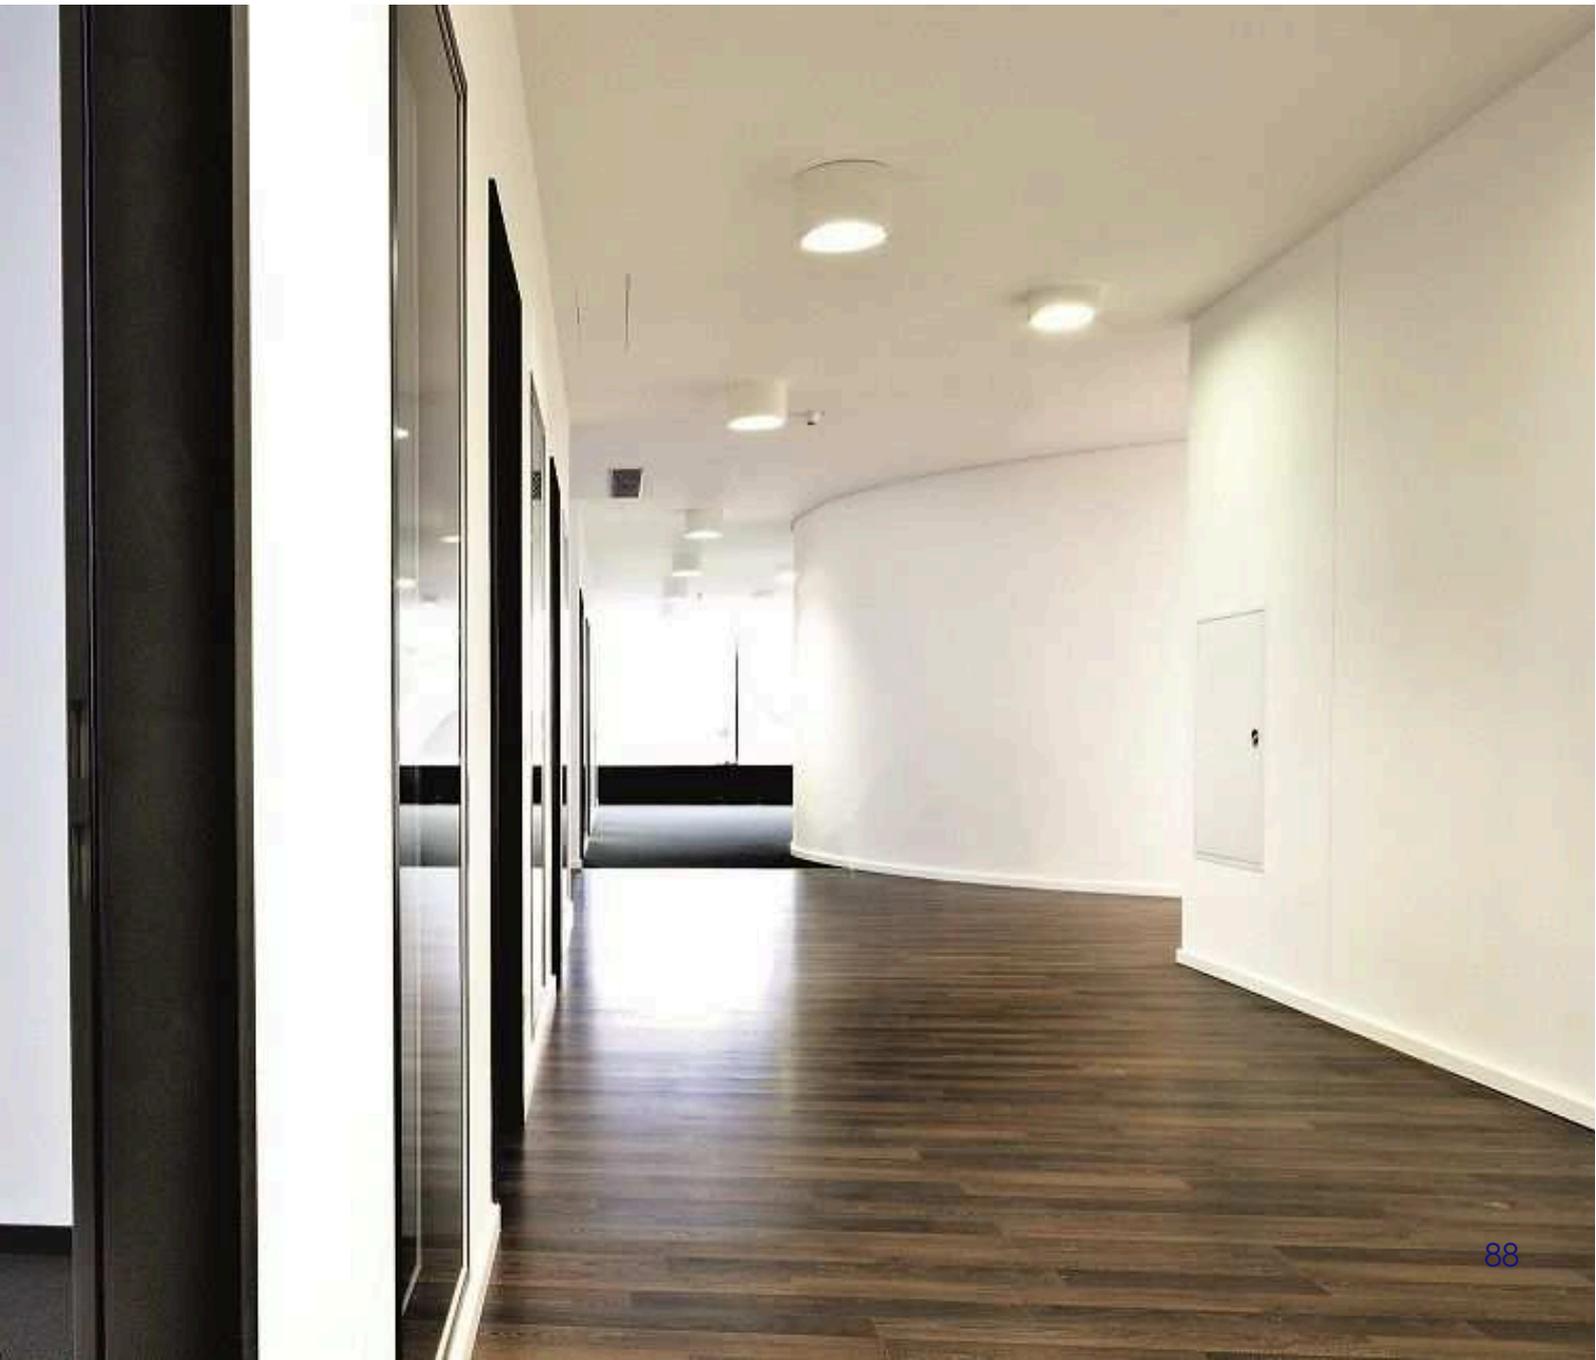

- Q-Series Skirting
- Hard-Foam Skirting
- Carpet Skirting
- Soft-PVC Skirting
- Clamping Skirting

Sustainability

Our skirting collections are produced with a strong focus on sustainability, combining energy-efficient manufacturing, closed-loop water and heat recovery systems, and comprehensive recycling of production materials.

All profiles are designed with reduced environmental impact in mind, meeting and exceeding strict EU standards by avoiding harmful substances and ensuring long-lasting, safe, and resource-conscious solutions for modern interior applications.

Skirting

Q-Series Skirting

The Q-Series embraces the “**clean edge**” trend with sleek, minimalist profiles that offer both a refined aesthetic and effortless installation. Available in heights of **40 mm, 60 mm, and 80 mm**, these skirtings deliver enduring performance through moisture resistance and dimensional stability.

Surface options include smooth, textured (grained), and brushed finishes, with design accents ranging from natural wood and metallic looks to select 3D décor colors - and custom options available for larger orders. Precision joinery is made simple with the appropriate tool, making interior and exterior corner fitting smooth and efficient.

Skirting

Hard-foam Skirting

This range represents the classic floor profile, designed for ease of installation and long-term performance. The profiles are moisture-resistant and remain dimensionally stable, featuring two flexible sealing lips for seamless integration between wall and floor, contributing to reduced impact noise.

Available in traditional object tones as well as decorative 3D and metallic finishes, this collection also offers customization options based on flooring samples, with higher-volume orders fulfilling specific color requests. Available heights and styles include models such as **SL 60, SL 80, SL 100, SL 55, PSL 58, PSL 58 F, Multi-SL 60, TSL 60, SL 48M, and BSL 60.**

Skirting

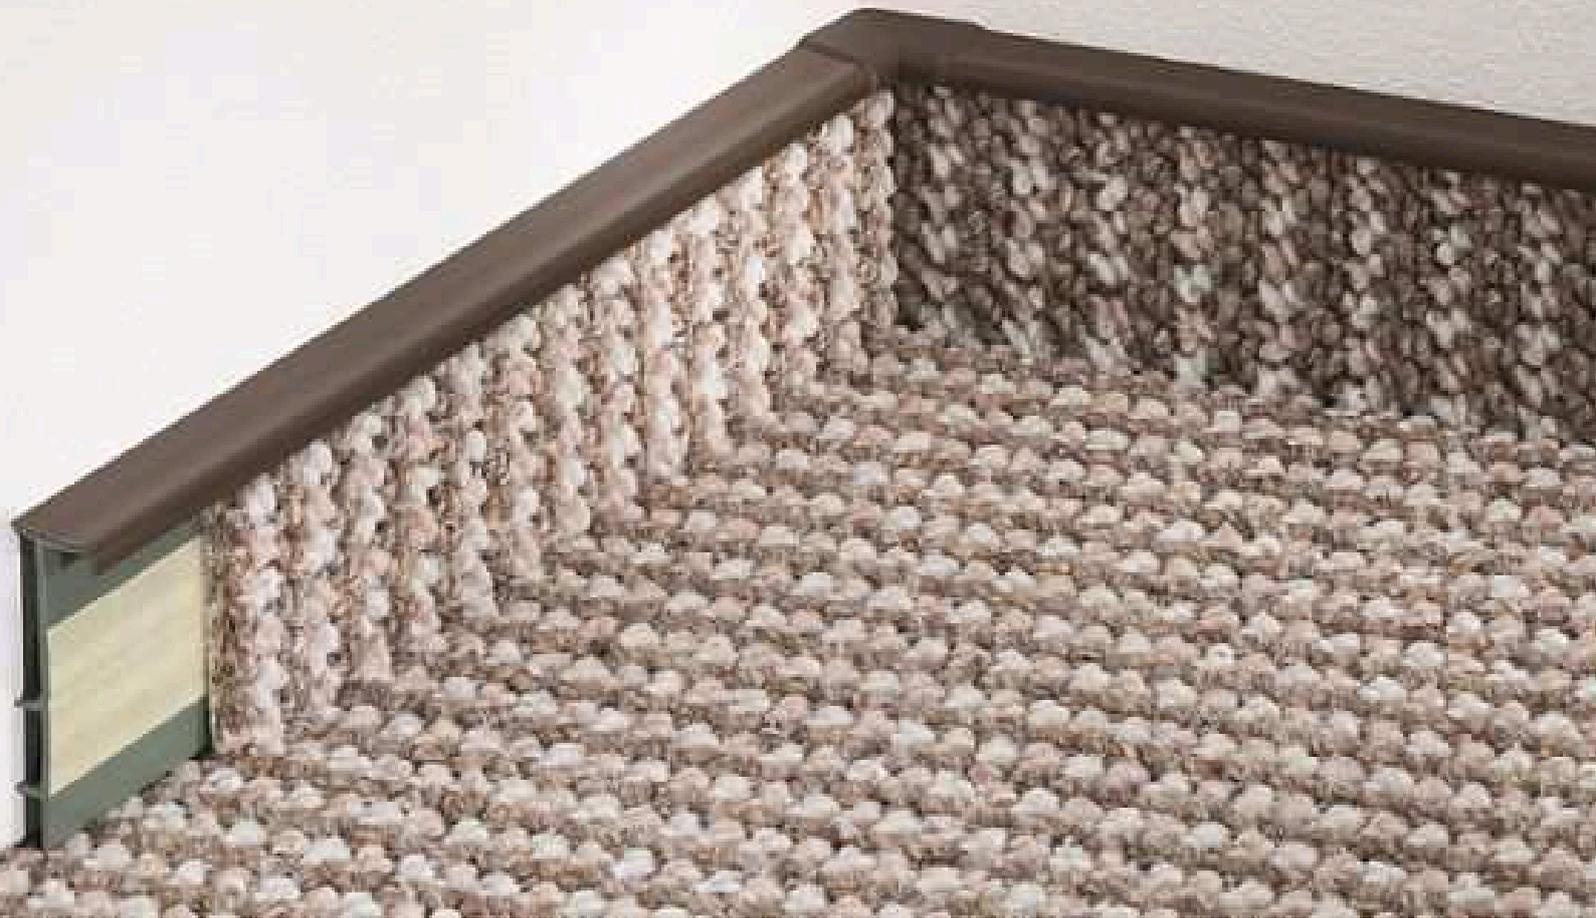

Carpet Skirting

Tailored specifically for textile floor coverings, these profiles are crafted in diverse shapes and colors to seamlessly complement a variety of fabric textures and styles.

Available in options made from foamed hard-PVC or blended materials featuring a soft upper layer, they offer self-adhesive variants ideal for project applications and are free of chlorine - making them easy to cut with a standard skirting-board cutter.

Installation is simplified further with a comprehensive accessory set included. Key profile models in this range include **TSL 55/6**, **TSL 55/6 SK**, **TSL 55/7**, and **TSL 55/9**.

Skirting

Concave Skirting

This hygienic profile is designed for settings where cleanliness is essential. The concave shape creates a smooth, rounded transition from floor to wall, eliminating sharp corners and making cleaning more efficient.

It also allows the flooring to extend seamlessly upward along the wall without the need for corner joints. Available variants include models such as **HKSL 2.5**, **HKSL 3**, and **HKP 16-50**.
