About GTV Global

GTV Global connects professionals in the UAE and GCC with high-quality, design-driven products from trusted international manufacturers.

Headquartered in Dubai, we work closely with architects, developers, and contractors to supply reliable, innovative solutions tailored to the demands of today's projects.

With a focus on distribution, specification support, and regional expertise, we represent leading brands from Europe, Asia, and the USA. Our team provides end-to-end assistance - from product selection to logistics - ensuring seamless integration into your project timeline.

We don't just supply products - we support your vision with technical knowledge, responsive service, and a curated portfolio that combines performance, sustainability, and design excellence.

Product Divisions

Our offering is built on strategic partnerships and a carefully selected range of products backed by market insight and feasibility. We supply premium solutions across five core divisions:

- Laminates & Boards - Durable, high-performance surfaces for modern interiors.
- Floor & Wall Coverings - Stylish, functional materials that elevate any space.
- Furniture - Elegant, practical designs for residential and commercial use.
- Fit out - Comprehensive products for bespoke interior & architectural needs.
- Windows, Doors & Gates - Precision-engineered for security, energy efficiency, and aesthetics.

Every product we offer meets rigorous quality standards and is chosen to support inspiring, long-lasting design.

Fit-out

We offer a refined selection of fit-out solutions to enhance modern workspaces:

- Office Partitions – Flexible glass and wood systems for defined yet open spaces
- Office Meeting Pods – Sound-insulated pods for privacy and focus
- Smart Lockers – Secure, intelligent storage for dynamic environments
- Security Partitions – High-security solutions with a sleek design

Combining functionality, aesthetics, and innovation, these products create adaptable and efficient interiors for offices and commercial spaces.

Office Partitions

Our office partition systems offer a sophisticated and flexible solution for shaping modern work environments.

Designed to balance openness with privacy, these partitions allow natural light to flow through spaces while creating defined, functional areas for collaboration or focus.

Combining sleek aesthetics with excellent acoustic performance, they help reduce noise and improve comfort, supporting productivity and well-being.

Available in a variety of finishes, materials, and configurations, the systems can be tailored to meet the specific design and technical requirements of any project.

Engineered for durability and ease of installation, these office partitions seamlessly integrate with contemporary interiors, making them an ideal choice for dynamic workplaces that value both form and function.

Partition

Our partition range offers versatile, high-quality system walls designed to meet diverse needs in offices and utility buildings. These partitions combine functionality, aesthetics, and performance, with options tailored for sound insulation, fire resistance, and flexible design.

Our modular construction allows for easy installation, relocation, and integration with other interior elements, creating efficient and adaptable spaces.

JB Pure 100

Partition - **JB PURE** range

The JB PURE range delivers high-performance partitions with minimalist design and excellent acoustic insulation.

Featuring slim, powder-coated aluminum profiles, they bring flexibility and style to modern offices.

Available Types:

- JB PURE 50 – Single-glazed with a sleek profile.
- JB PURE 100 – Double-glazed, up to 53 dB sound insulation.
- JB PURE 100 Wood – Warm wood veneers with high acoustic performance.
- JB PURE Quiet – 200 mm thick for superior sound insulation.

Office Partitions

JB Pure 100

JB 4000 Steel Line

Partition - **JB 4000 range**

The JB 4000 series features minimalist single-glazed partitions that highlight transparency and clean lines. With continuous powder-coated aluminum profiles, they offer architectural elegance and reliable performance.

Available types:

- B 4000 – Standard single-glazed with sleek, seamless transitions.
- JB 4000 XL – Extended version for heights up to 3.8 meters.
- JB 4000 Steel Line – Subdivided glass panels with profiles for an industrial look.
- JB 4000 Wood – Natural wood profiles for a warm, timeless aesthetic.

All JB 4000 systems integrate seamlessly with other partition solutions, providing flexibility and cohesion for diverse interior projects.

With ceramic panels

Partition - **JB 2000 range**

The JB 2000 series is a highly versatile relocatable partition system, valued for its modular design, acoustic performance, and refined aesthetic.

Built on a robust steel framework, it accommodates panels in wood chipboard, metal, or glass and can be reconfigured easily without specialized tools.

Available types:

- JB 2000 – Standard full partition with excellent sound insulation & fire resistance.
- JB 2000 Quiet – Enhanced acoustic version with sound insulation up to 64 dB.
- JB 2000 Frame – Double-glazed with visible aluminum frames for a balanced, contemporary look.
- JB 2000 Flush – Sleek, all-glass design with bonded panels & concealed frames.
- JB 2000 Frame Wood – Aluminum structure with warm wooden profiles for a natural finish.

GTV Global

JB 2000 Flush

Office Partitions

Partition - **JB QBE**

The JB QBE is a freestanding, modular unit designed to create enclosed, functional spaces within open environments.

Ideal for meeting rooms, focus areas, or private conversations, it delivers a complete room solution with integrated walls, ceiling, ventilation, and optional furnishings.

Key Features:

- Flexible & modular – Reconfigurable layout, compatible with other systems.
- Design options – Transparent or solid walls for different privacy needs.
- Quick setup – Plug-and-play, no permits required.
- Acoustic & fire performance – Adjustable sound insulation and EI00-rated safety.

JB QBE enhances privacy and productivity with a practical, stylish solution for open spaces.

Office Partitions

Partition - **JB Fireglass**

The JB Fireglass system combines fire safety with a modern, transparent design. It allows for open, light-filled interiors while ensuring compliance with fire protection standards.

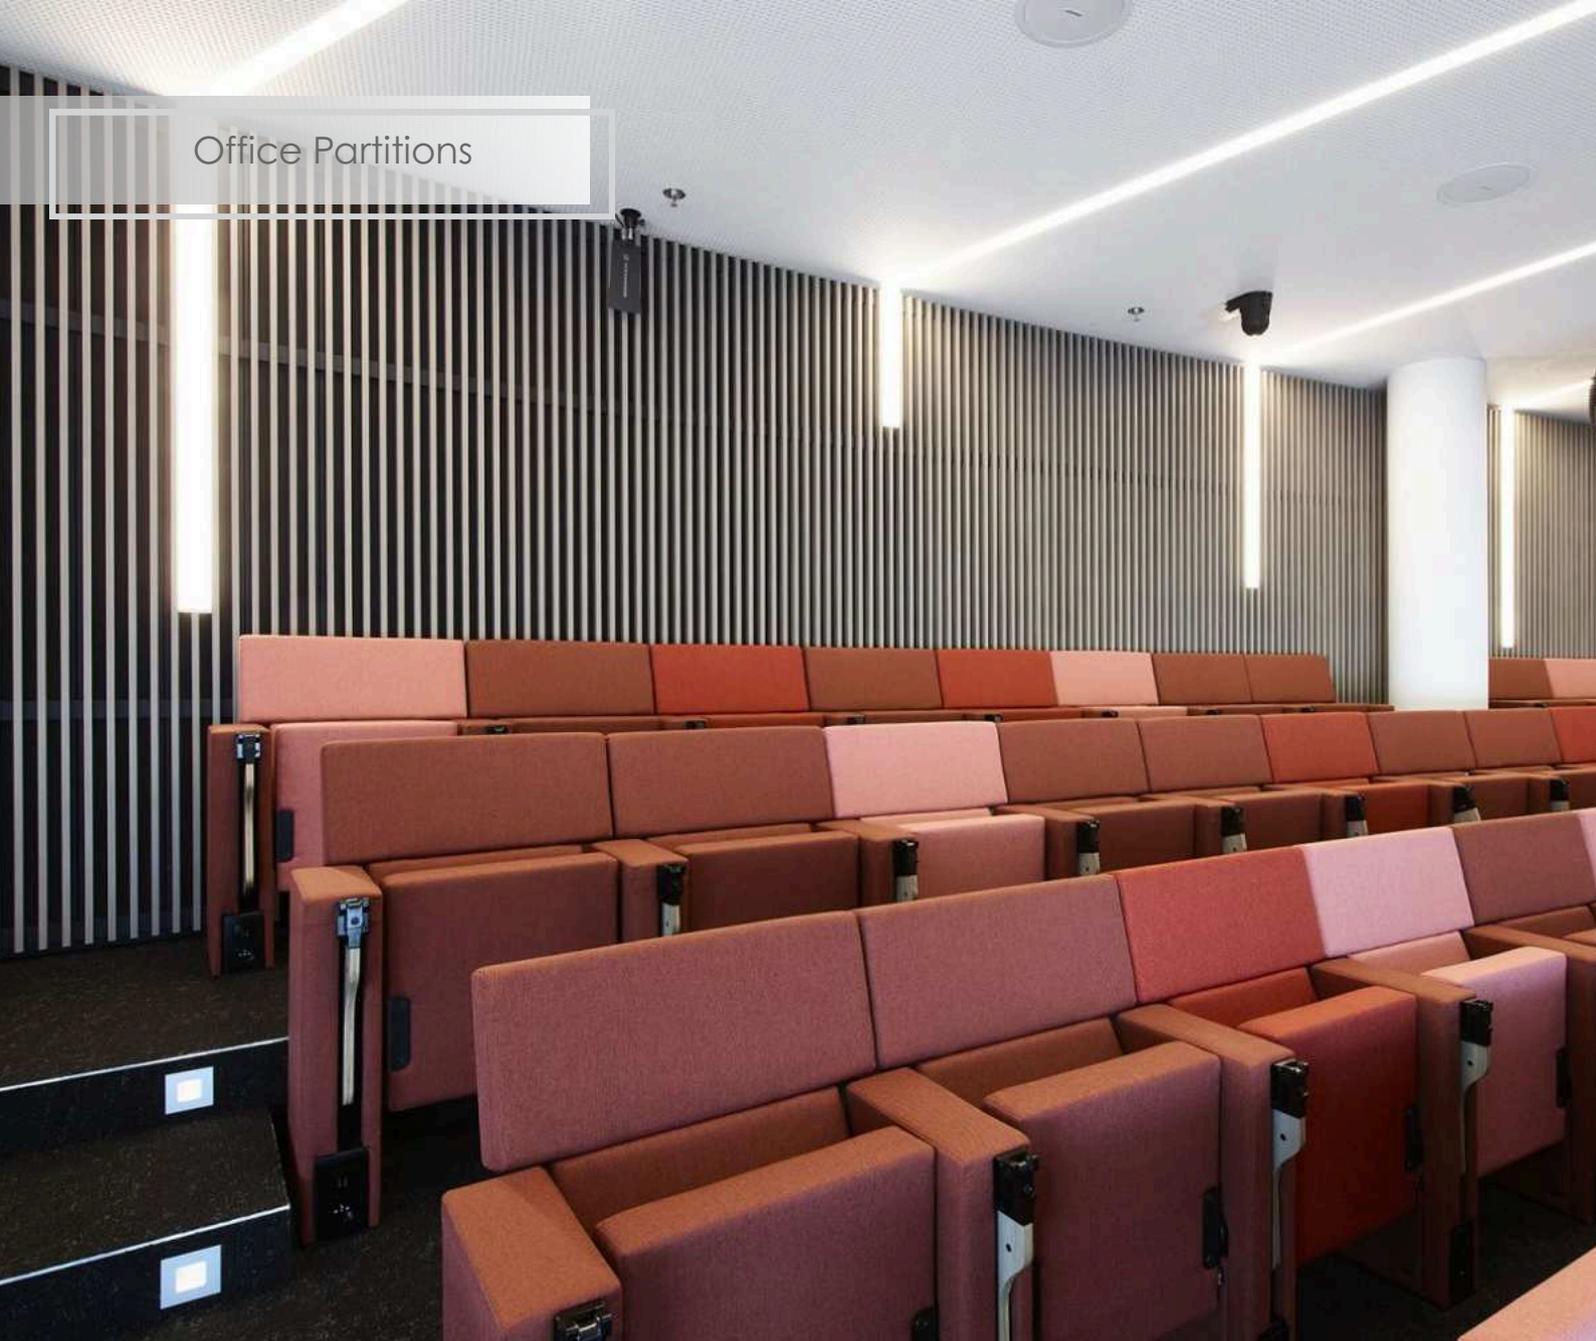

Key Features:

- Fire resistance up to EI120 for partitions; doors available with EI30 and EI60 ratings
- Safe evacuation routes and clear zoning for enhanced fire safety
- Minimalist design with glass modules and matching doors that maintain spatial openness

JB FIREGLASS is ideal for creating safe, visually open environments in offices and utility buildings.

Office Partitions

Partition - **JB Absorb**

JB Absorb is a fully demountable partition system designed to offer high acoustic comfort with a sleek, seamless look.

It integrates a steel stud frame with an acoustic core and plasterboard finish, creating a flush, paint-ready surface.

Key Features:

- Seamless finish with no visible joints or profiles
- Excellent acoustic performance for improved sound insulation
- Demountable and reconfigurable, ideal for flexible interiors
- Compatible with other partition systems and flush door integration

JB Absorb is perfect for modern offices seeking both acoustic control and a clean architectural aesthetic.

Partition - **JB Wood Claustria**

JB Wood Claustria is a decorative wooden slat wall system that enhances interior spaces with a warm, natural aesthetic.

It provides visual separation while maintaining an open and airy feel, making it ideal for offices, lobbies, and collaborative areas.

Key Features:

- Natural wood finish for a warm, elegant appearance
- Open structure that preserves light and spatial flow
- Flexible configuration for walls, ceilings, or freestanding applications
- Modular design that integrates easily with other fit-out elements

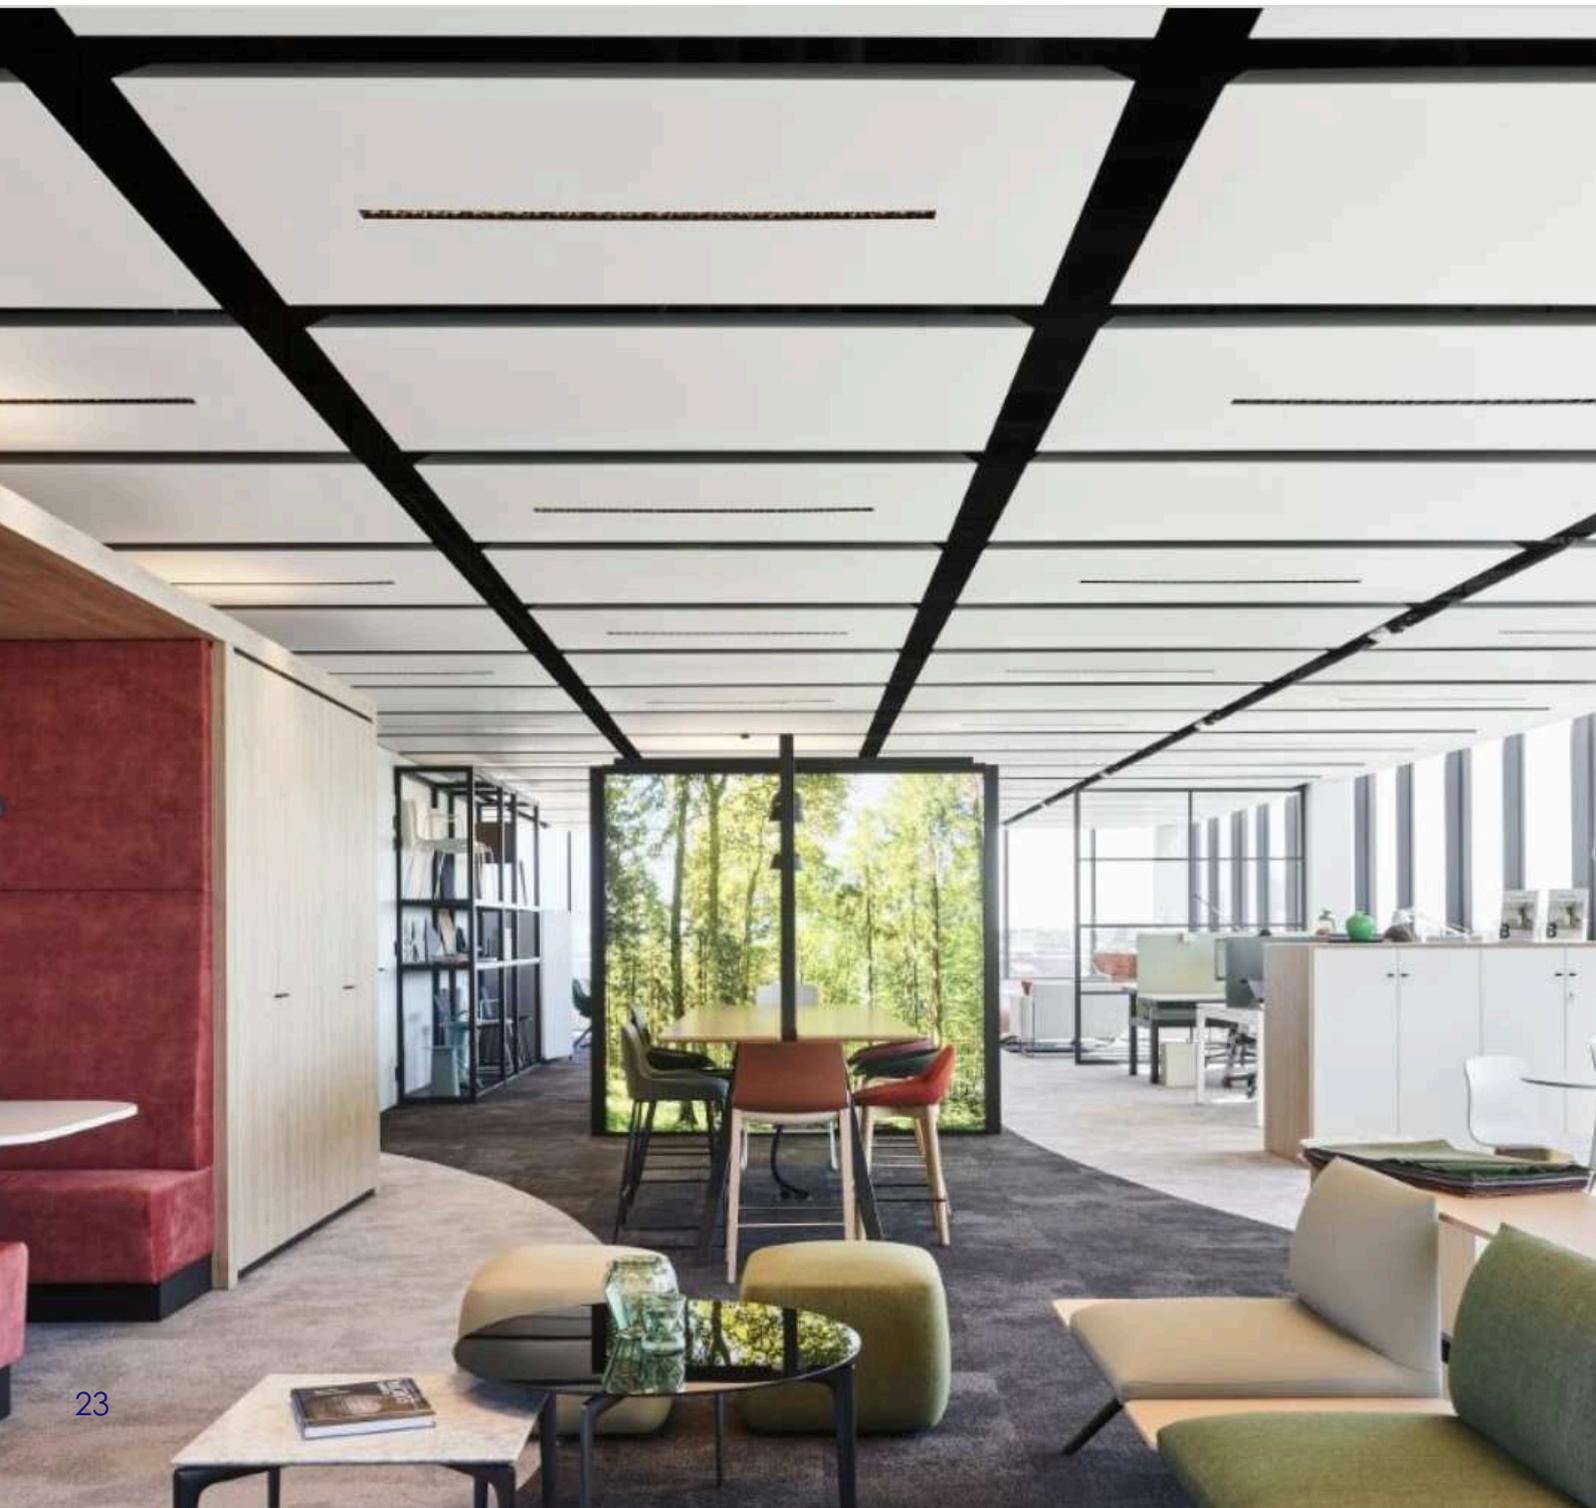

JB Wood Claustria is perfect for adding texture, depth, and design character to contemporary interior environments.

Ceiling

These ceiling systems combine performance, sustainability, and design for modern offices and utility spaces.

- JB Cool Climate Ceiling – Integrated heating & cooling for energy-efficient comfort.
- Phaseo PCM Climate Ceiling – Passive temperature control using phase change materials.

JB Cool Climate Ceiling

Office Partitions

Phaseo PCM Climate Ceiling

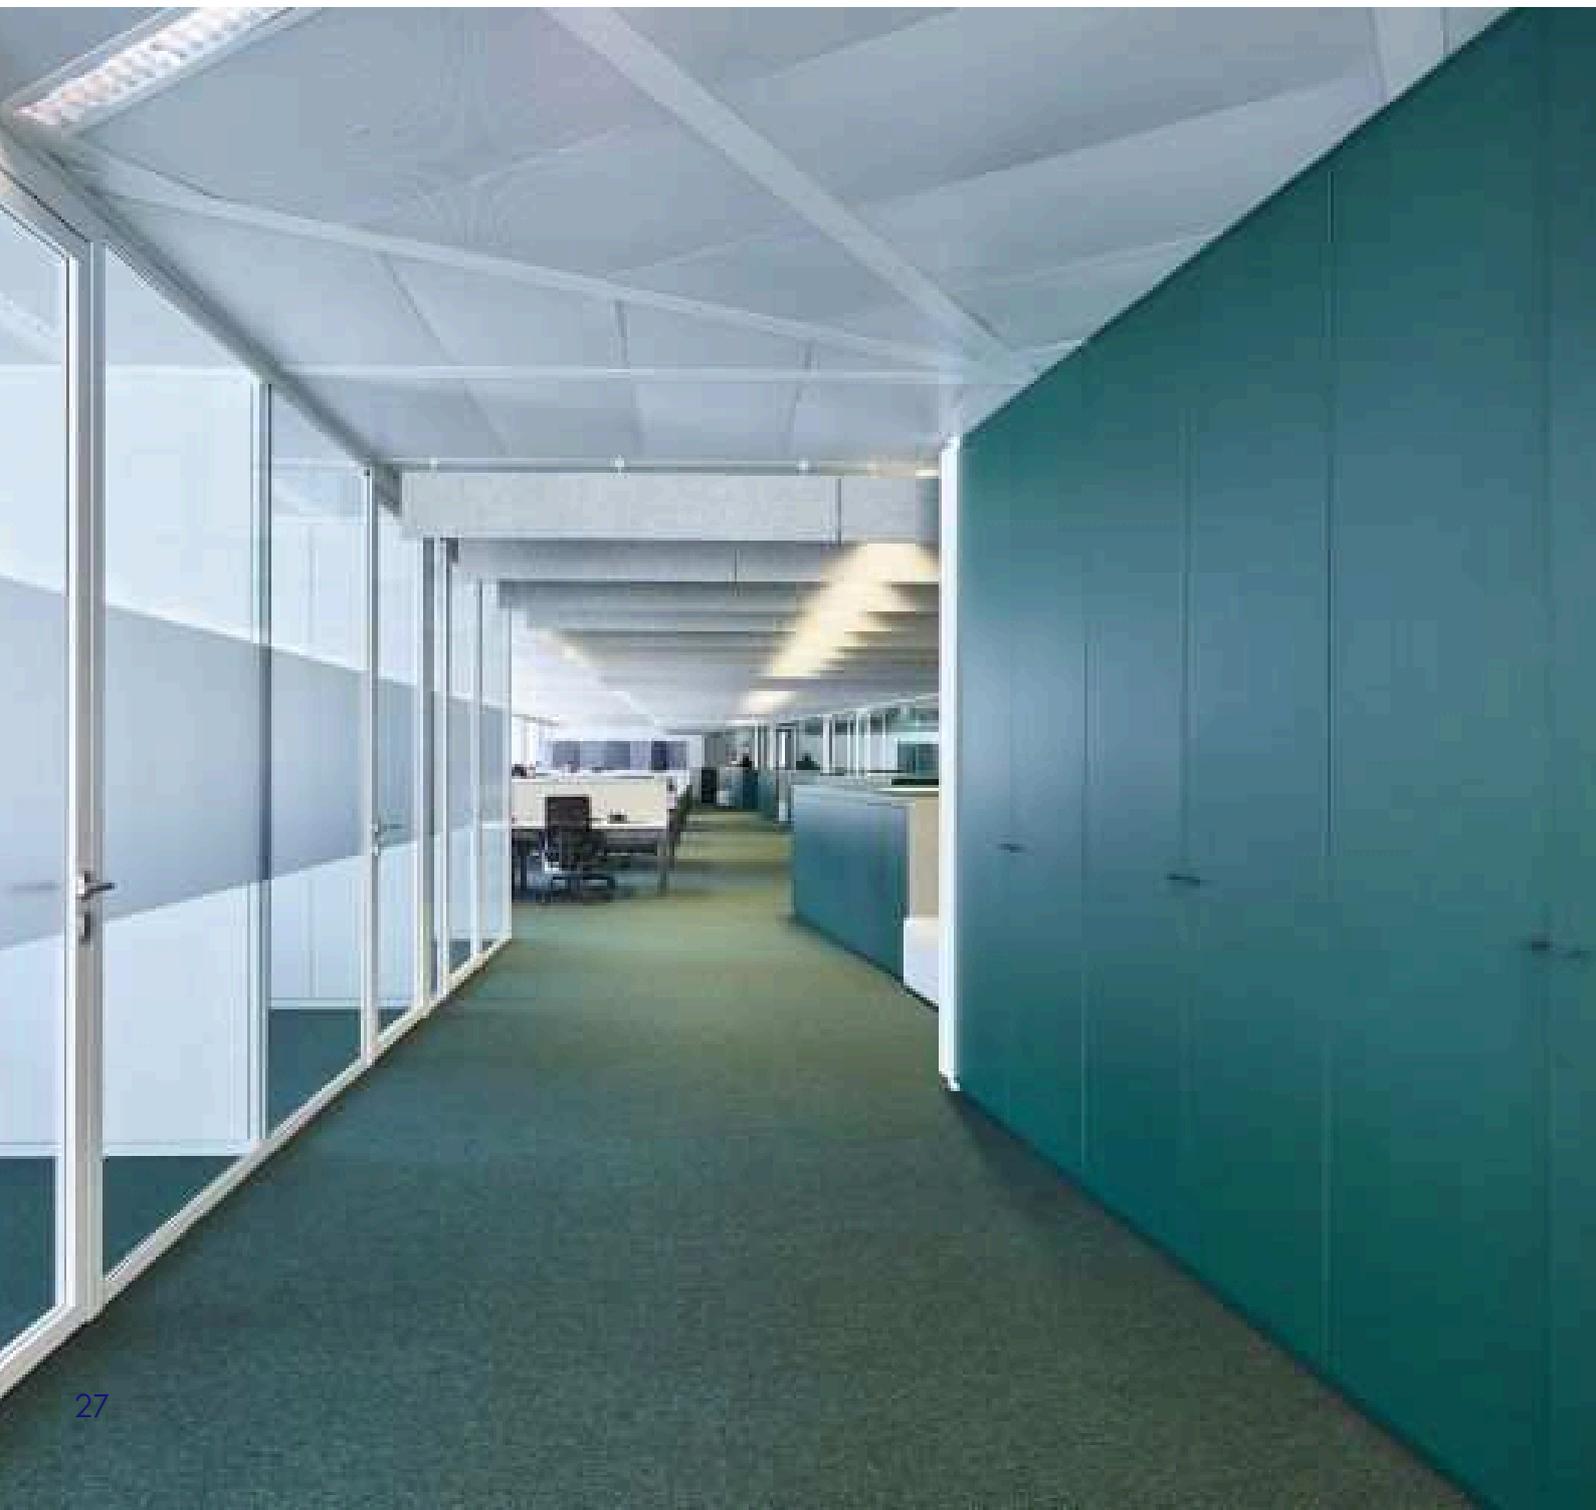

Phaseo PCM Climate Ceiling

Office Furniture

The JB Office collection offers functional, ergonomic, and stylish furniture for modern workspaces.

- JB Desk – Versatile desks and tables, including sit-stand options
- JB Store – Storage solutions that double as dividers or seating
- JB Lockers – Secure, contemporary personal storage

Complemented by acoustic solutions for a balance, efficient office environment.

Meeting Pods

Not your average meeting pods.

When it comes to meeting pods, not all solutions offer the same level of comfort, privacy, and performance. Our pods stands out with its premium build quality, medical-grade air purification, and true soundproofing - delivering a space that feels like an actual room, not a compromise.

Whether your project is a high-traffic office or a quiet co-working hub, our pods adapts to your needs without sacrificing style or function.

Key Features

Sizes

Sample Layout

Key Features

Good air quality is essential since it keeps us alert and helps prevent fatigue and headaches caused by stale indoor air.

Our standalone, flexible meeting rooms provide a healthy, productive space for private work and meetings alike.

- Soundproof & Private – Keeps conversations confidential
- Clean Air – Medical-grade filtration removes 99.9% of airborne particles
- Self-Sanitizing – UV-C tech disinfects air and surfaces automatically
- Customizable & Modular – Various sizes and finishes to fit your space
- Eco-Conscious – Built with sustainable, energy-efficient materials
- Ready to Use – Quick plug-and-play installation

Sizes

The office pod collection offers a range of sizes to suit different needs, from compact one-person pods for focused work to spacious booths accommodating up to ten people for meetings and collaborative tasks. Designed to maximize comfort, privacy, and functionality, each pod combines excellent acoustics and air quality with flexible layouts, making them ideal for both individual and team use in any modern workspace.

Meet up,
stay safe

Meeting Pods

Size - XS

Great for 1 person.

Our smallest pod doesn't compromise on comfort or convenience.

It's ideal as an office phone booth for private, distraction-free, conference calls and is quick to install and easy to move thanks to the wheels.

- Best in class soundproofing
- Excellent ventilation for fresh air
- Plug and play, ready for use straight after installation
- Built-in wheels for easy relocation
- Integrated charging ports (2 x USB)
- Long lifecycle thanks to professional build quality and industrial-grade components

Size - **XS+**

A smart solution for hybrid work.

The XS+ 1-person pod offers a quiet, comfortable space for focused, long-term work. With excellent soundproofing, filtered ventilation, and room for an ergonomic chair, it supports productivity all day.

- Superb A-class soundproofing (ISO 23351-1)
- Filtered fresh air for continuous use
- Plug-and-play installation
- Space for ergonomic chair & adjustable table (optional)
- Discreet wheels for easy mobility
- Durable, high-quality construction

Size - **S and S+**

The 2 person meeting pod.

This compact 2 person meeting pod doubles as a personal space pod for video conferences, phone calls, or private corridor discussions. You can design and furnish it according to your needs from a variety of options.

- Best in class soundproofing
- Automated, smart CO₂-controlled ventilation allowing continuous use
- Plug and play, ready for use straight after installation
- ISO 7 class indoor air quality performance
- Antimicrobial LED lighting
- Patented, dual-panel sliding door
- Long lifecycle thanks to professional build quality and industrial-grade components

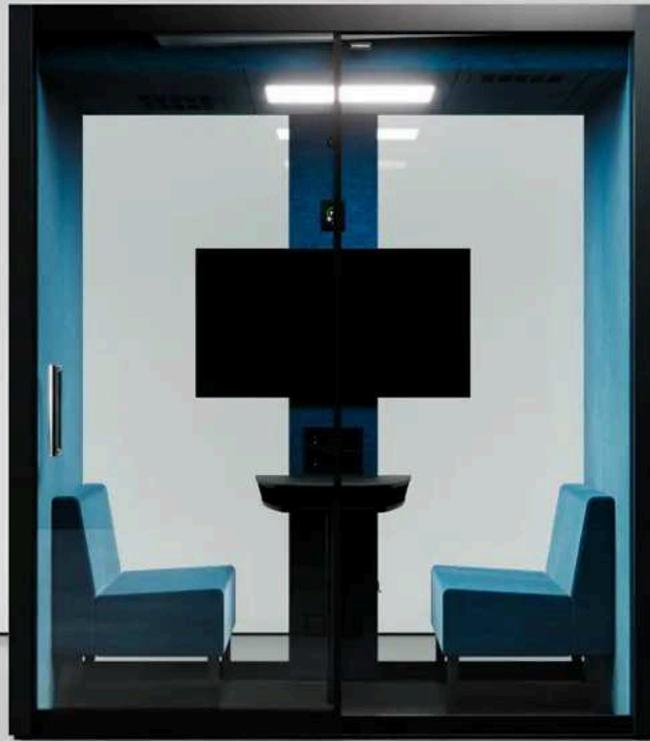

Size - M

Perfect as a private work pod.

Accommodates 1–3 people, perfect for focused work, meetings, or as a breakout space. Customize and furnish it to suit your needs.

- Best-in-class soundproofing
- Smart CO₂-controlled ventilation for continuous use
- Plug-and-play, ready on delivery
- ISO 7 indoor air quality
- Antimicrobial LED lighting
- Patented dual-panel sliding door
- Durable, industrial-grade construction

Size - **M+**

A perfect 4 person meeting room.

Just like our larger pods, its superb soundproofing and efficient ventilation make for a highly productive environment.

- Best in class soundproofing
- Automated, smart CO₂-controlled ventilation allowing continuous use
- Plug and play, ready for use straight after installation
- ISO 7 class indoor air quality (IAQ) performance
- Antimicrobial LED lighting
- Patented, dual-panel sliding door
- Easy access for people with mobility limitations
- Long lifecycle thanks to professional build quality and industrial-grade components

Size - **L and L+**

Spacious enough for up to 6 people.

This large pod serves as a soundproof meeting room or customer service point, offering a comfortable and refreshing environment. Customize and furnish it to suit your needs.

- Best-in-class soundproofing
- Smart CO₂-controlled ventilation for continuous use
- Plug-and-play, ready on delivery
- ISO 7 indoor air quality
- Antimicrobial LED lighting
- Patented dual-panel sliding door
- Accessible for people with mobility limitations
- Durable, industrial-grade construction

Size - XL

Great for a team of 8.

Enjoy exceptional sound insulation and air quality in our second-largest pod, which offers plenty of space for up to eight and also works as a cozy private space.

- Best in class soundproofing
- Automated, smart CO2-controlled ventilation allowing continuous use
- Plug and play, ready for use straight after installation
- ISO 7 class indoor air quality (IAQ) performance
- Antimicrobial LED lighting
- Patented, dual-panel sliding door
- Easy access for people with mobility limitations
- Long lifecycle thanks to professional build quality and industrial-grade components

Size - **XXL**

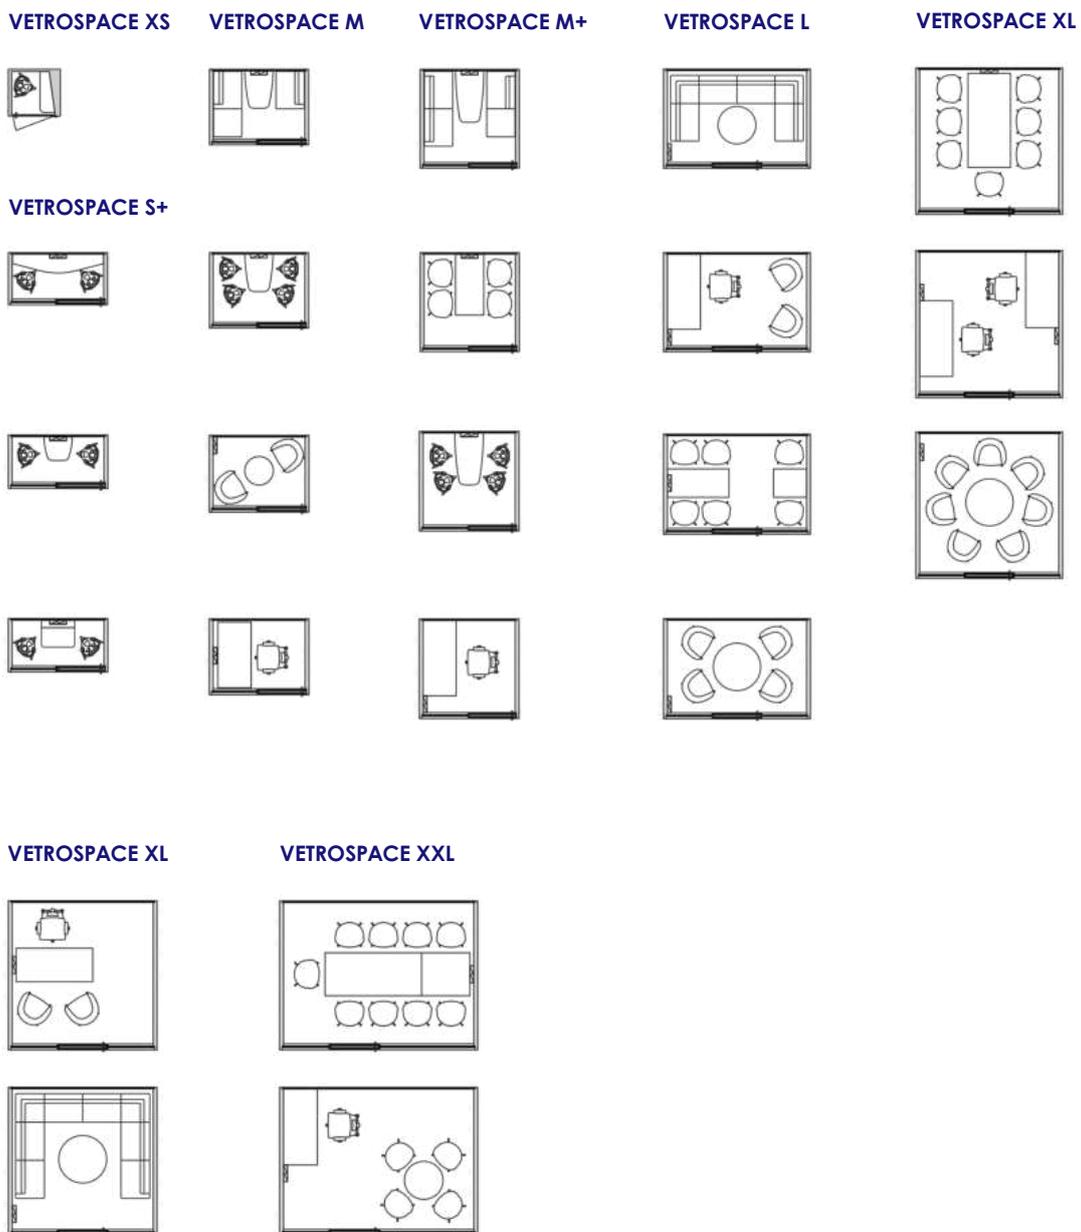

Ideal for up to 10 people.

Our largest pod provides a spacious, soundproof environment for meetings, collaborative work, or creative sessions. Flexible and durable, it can be customized and furnished to suit your needs.

- Best-in-class soundproofing
- Smart CO₂-controlled ventilation for continuous use
- Plug-and-play, ready on delivery
- ISO 7 indoor air quality
- Antimicrobial LED lighting
- Patented dual-panel sliding door
- Accessible for people with mobility limitations
- Built to last with high-quality, industrial-grade components

Sample Layout

Each pod features a smart layout tailored to its size — from compact workstations for individuals to collaborative setups for groups. Interiors can be customized with ergonomic furniture and integrated technology for comfort and productivity.

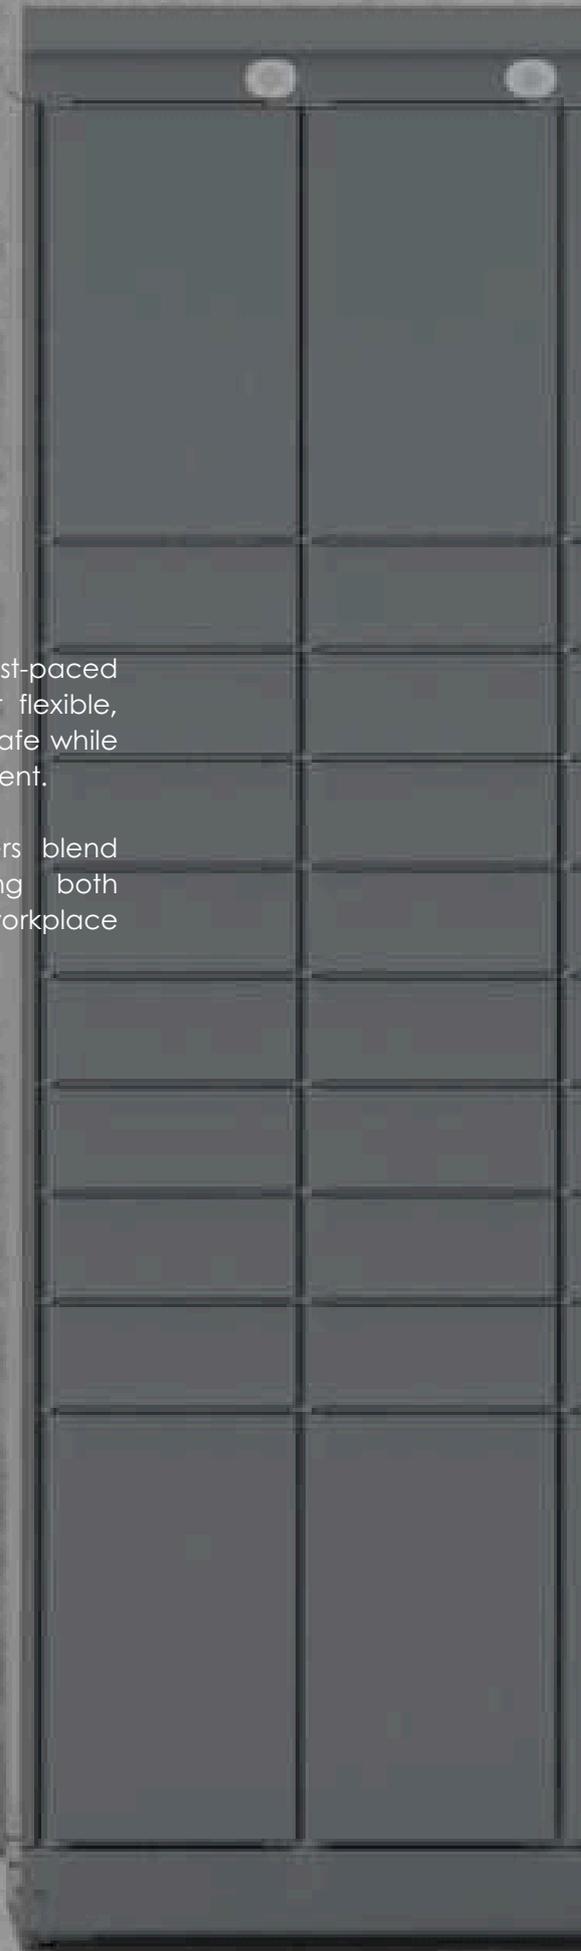

Smart Locker

Intelligent Lockers.

Secure and efficient storage is essential in today's fast-paced workplaces. Our locker systems are designed to offer flexible, durable solutions that keep personal and shared items safe while helping maintain an organized and clutter-free environment.

With a variety of customizable options, these lockers blend seamlessly into modern office settings, supporting both functionality and design. They are ideal for enhancing workplace efficiency and promoting a clean desk culture.

PROJECT MANAGEMENT

We plan and project manage your locker system, right up to networking

PRODUCTION

The locker banks will be manufactured using the latest technology, in accordance with your requirements

SOFTWARE

We offer our own software solutions for smooth processes

INSTALLATION

We deliver and install the locker systems and train your employees

SERVICE

Even after delivery, we are happy to help

Collections

The smart locker range offers secure, versatile solutions for parcel delivery, storage, and service processes. With options for indoor and outdoor use, the systems support contactless handovers, automated notifications, and modular configurations to fit diverse applications in retail, logistics, public spaces, and workplaces. Designed for efficiency and user convenience, these lockers enhance service workflows while ensuring safety and reliability.

Cool Lockers

Cool Lockers offer secure, well-ventilated storage that keeps contents clean and odor-free - ideal for workplaces, gyms, and healthcare settings.

Key Features:

- Advanced ventilation system for freshness
- Durable, hygienic materials
- Modular and customizable design
- Secure locking options (electronic & mechanical)
- Easy to use and maintain
- Suitable for a variety of high-traffic settings

Locksafe

LockSafe lockers offer highly secure, flexible storage solutions designed to protect valuable items in demanding environments.

With robust construction and multiple locking options, they ensure safety without sacrificing convenience.

Key Features:

- Strong, impact-resistant design
- Variety of locking systems including electronic and mechanical
- Modular and adaptable to different needs
- Easy to operate and maintain
- Ideal for workplaces, schools, and public spaces requiring secure storage

Smart Lockers

Service Box

ServiceBox offers secure, user-friendly parcel and document storage solutions designed to streamline deliveries and collections in busy environments. Its modular design and reliable locking mechanisms ensure safe, organized handling of items.

Key Features:

- Secure storage for parcels and documents
- Modular and scalable system
- Various locking options for user convenience
- Designed for workplaces, residential buildings, and public facilities
- Easy to access and maintain

Velosafe

VeloSafe provides secure, weather-resistant bike storage designed to protect bicycles from theft and damage.

Its sturdy construction and practical design make it perfect for workplaces, residential areas, and public spaces.

Key Features:

- Robust and weatherproof bike storage
- High-security locking system
- Space-efficient design
- Easy access and user-friendly
- Ideal for offices, housing complexes, and urban environments

Smart Lockers

Velobox

A secure and convenient bike storage solution designed to protect bicycles from theft and weather while saving space. Its robust construction and easy access make it ideal for workplaces, residential areas, and public spaces.

Key Features:

- Secure, weather-resistant bike storage
- Space-saving, compact design
- Easy to use with secure locking mechanisms
- Suitable for offices, apartment complexes, and urban areas
- Durable materials for long-lasting protection

Security Partition

Integrated safety systems for high-security applications.

Our integrated safety systems combine advanced technology and robust design to deliver reliable protection for sensitive environments. From bullet-resistant partitions to controlled access solutions, these systems ensure safety without compromising on functionality or aesthetics.

Designed for demanding sectors such as banking, government, and industrial facilities, our high-security applications offer customized solutions tailored to meet strict safety standards. They provide peace of mind by safeguarding people, assets, and information in any high-risk setting.

Features

Collections

Features

- Certified resistance to bullets, forced entry, and fire
- Tailored dimensions, configurations, and finishes to meet specific requirements
- Integrated glazing, communication, and transfer systems
- Rapid deployment of protective elements in critical situations
- Robust, durable construction for long-term performance
- Balances stringent security with an approachable, functional design

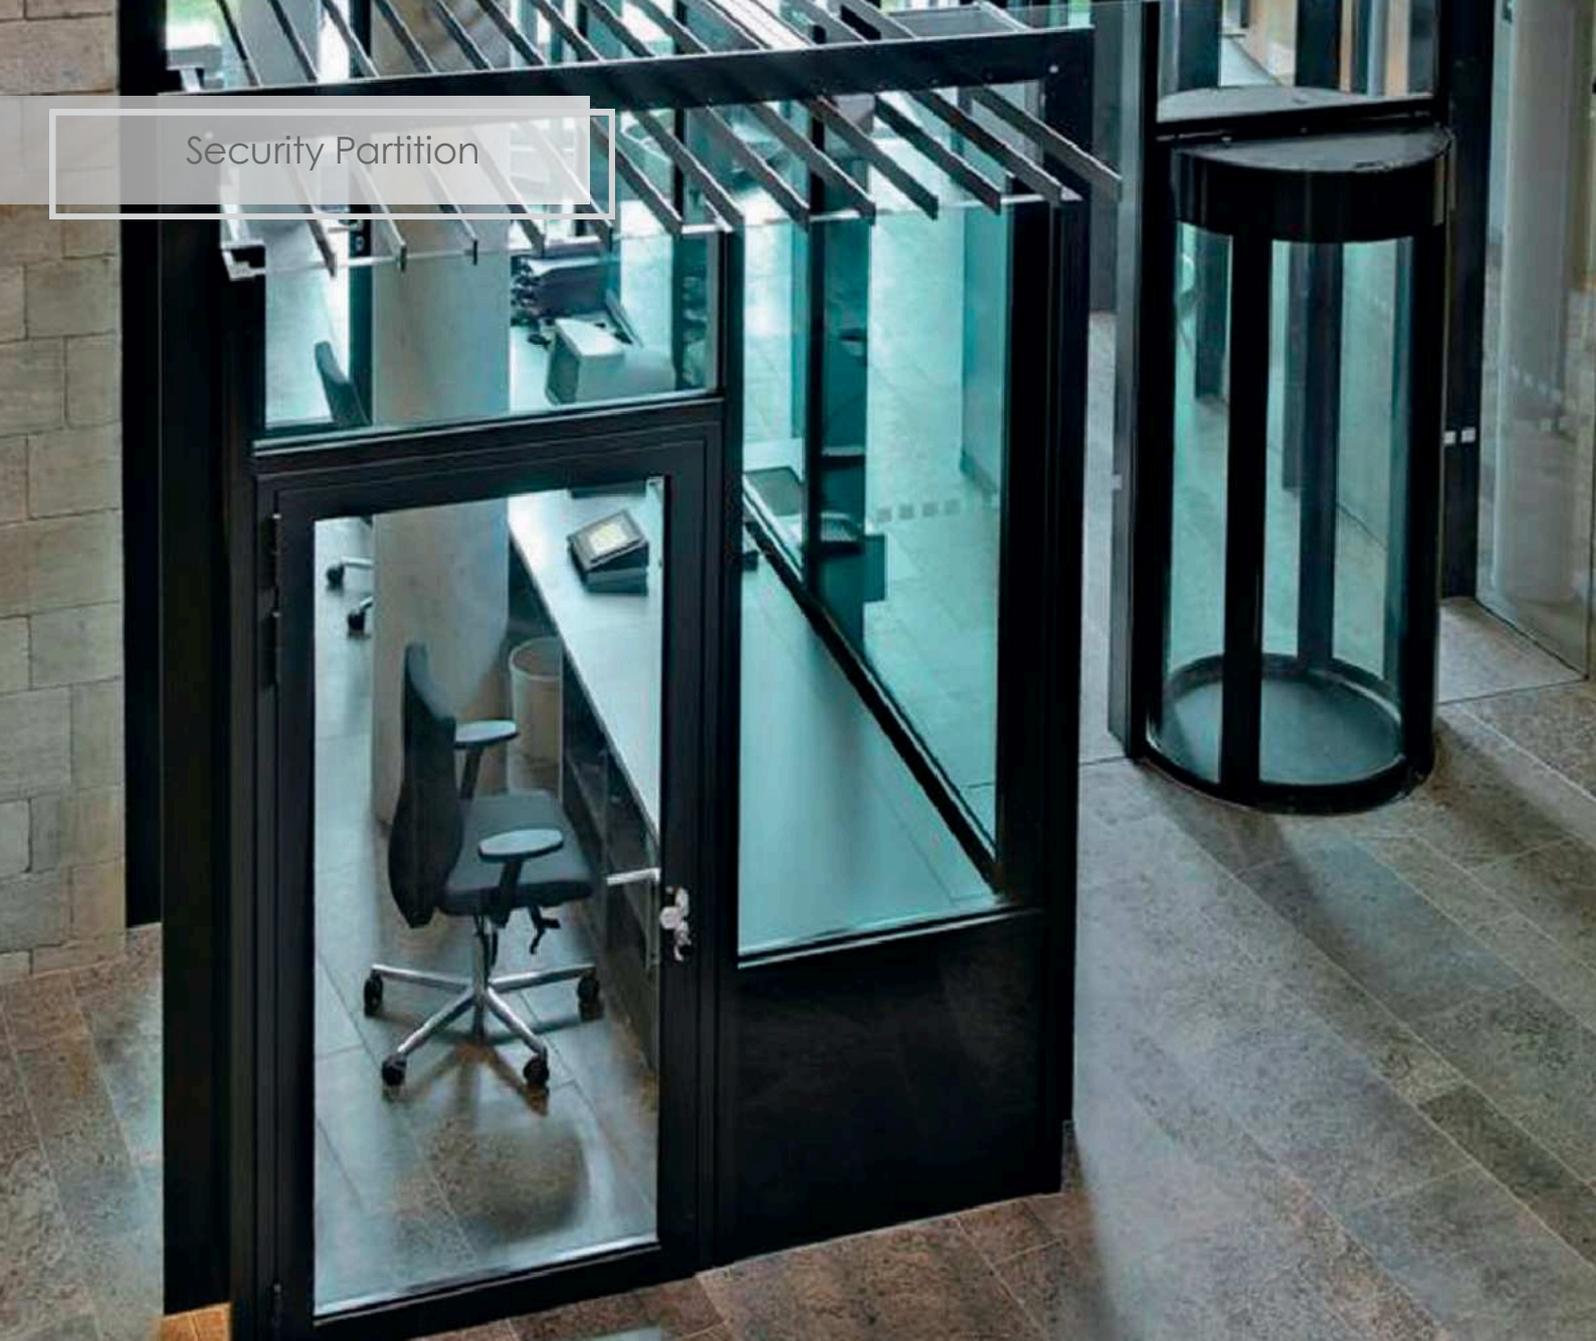

Collections

Our security partitions are available in bullet-resistant, burglary-resistant, fire-resistant, and combined configurations.

Each solution is designed to meet specific safety needs, providing certified protection while maintaining functionality and a professional appearance.

Security Partition

Pass-through systems

We provide secure transfer systems for safely exchanging documents, goods, or cash between secure and unsecured areas — essential for banks, pharmacies, government buildings, and industrial facilities.

Key Features:

- Pass-Throughs: Built into counters for safe transfer through fixed glass
- Transfer Trays: Mechanical sliding trays for protected item exchange
- Facade Counters: Wall-mounted units for secure, contactless transactions
- Material & Container Locks: Floor-mounted systems with interlocking doors for larger items
- Door Pass-Throughs: Compact units in doors for secure handovers without compromising security
- UV-C Disinfection: Disinfects items during transfer to reduce pathogen risk

Customizable to meet specific security requirements, these solutions ensure both safety and operational efficiency.

Complete System

These ready-to-install security systems are built for high-risk environments like banks, embassies, and government offices, combining robust protection with practical functionality.

Key Features:

- Fully equipped units with integrated frames, glazing, transfer trays, and intercoms
- Options in bullet-resistant, burglary-resistant, and fire-resistant designs
- Ideal for reception areas, visa offices, and official facilities
- Customizable for brick walls or metal facades
- Suitable for indoor or sheltered outdoor use

Security Partition

Security Counters

Security counters combine robust protection with an open, customer-friendly design, ideal for banks, pharmacies, offices, gas stations, jewelry stores, and casinos.

Key Features:

- Bullet-resistant panels that deploy instantly in emergencies
- Certified ballistic glass (BR4-NS) and steel panels (FB4)
- Open layout for secure, personal interaction
- Customizable dimensions to suit any space
- Backup power for uninterrupted operation

A safe, adaptable, and approachable solution for high-risk public areas.

Sensor Gates

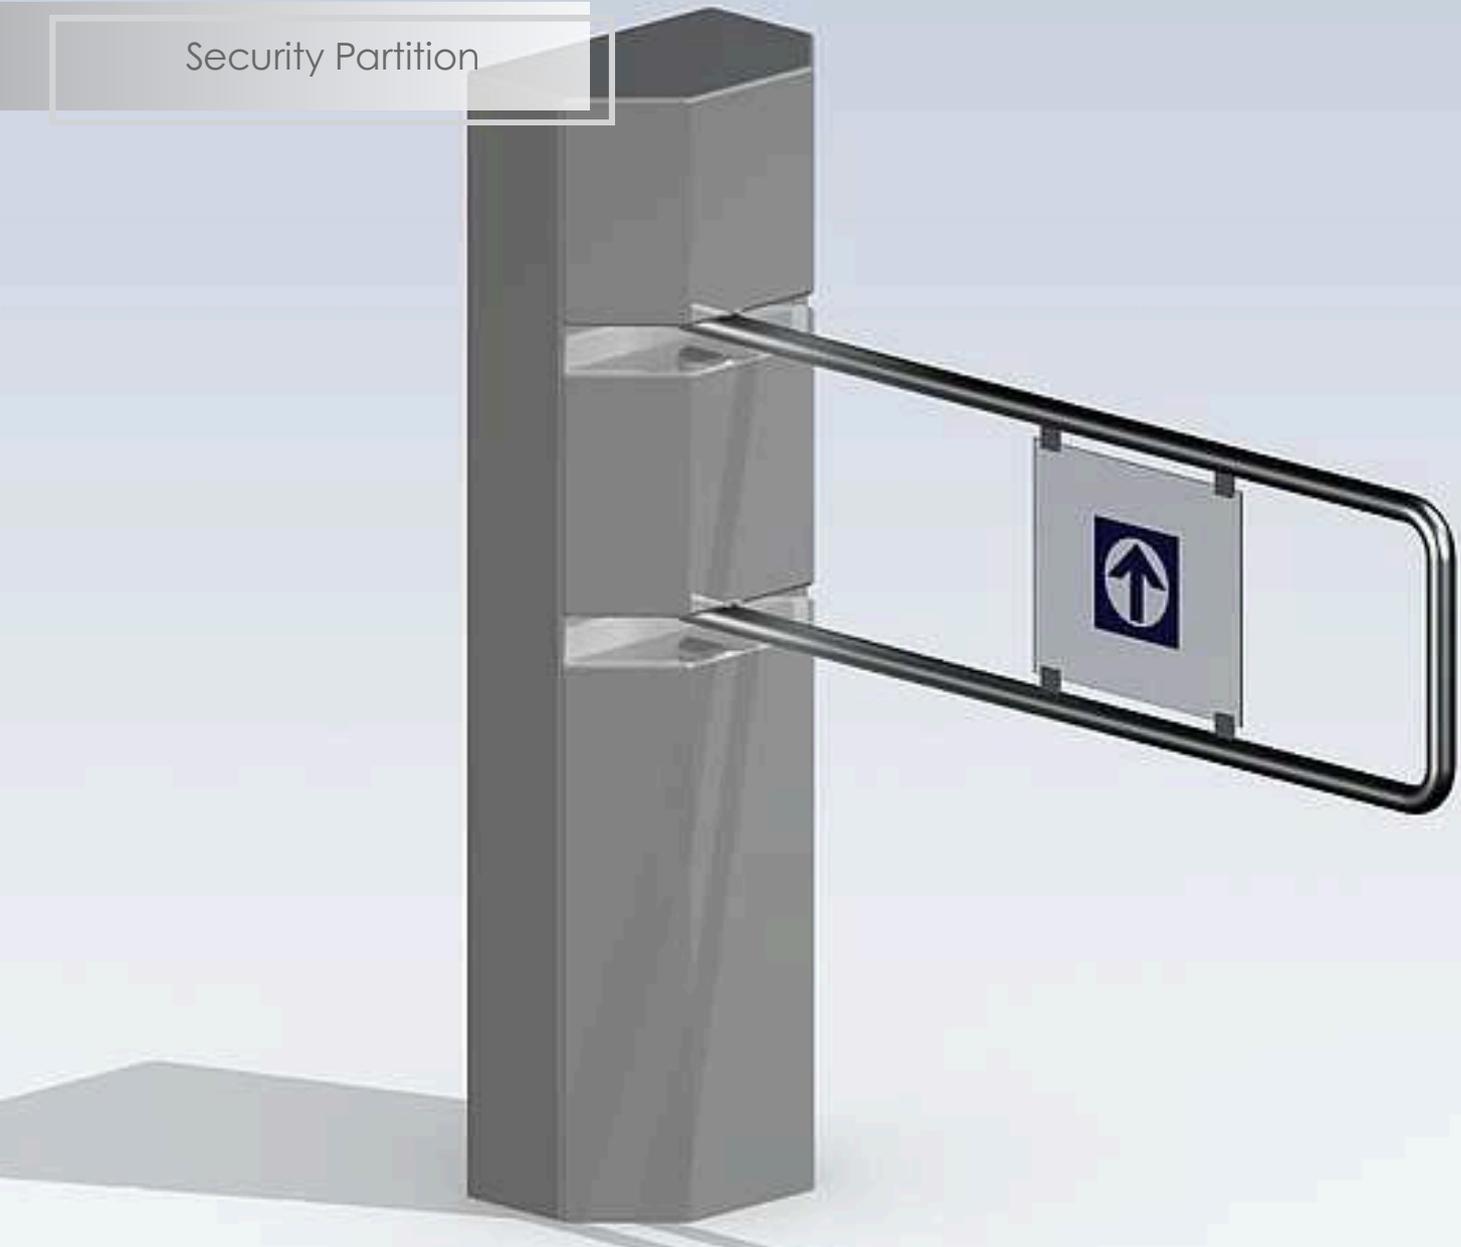

Sensor barriers provide secure, efficient access control for high-traffic areas like airports, offices, and industrial sites, ensuring smooth pedestrian flow.

Key Features:

- Electromechanical with retractable glass wings
- Supports one-way or two-way traffic
- Compatible with visible or concealed card readers
- Automatic opening during power failure or fire alarm
- Customizable glass (clear, tinted, or printed)
- Standard 560 mm width, optional 900 mm for accessibility

A smart combination of security, safety, and modern design.

Security Partition

Turnstiles and turnstiles

Turnstiles and rotary barriers are reliable solutions for regulating and monitoring pedestrian flow in secure areas. Suitable for indoor and outdoor use, they ensure only authorized individuals gain entry.

Key Features:

- Available in stainless steel or powder-coated finishes
- Designed for one- or two-way traffic
- Manual, motor-driven, or fully automatic operation
- Optional integration with card readers and biometric systems
- Weather-resistant versions for outdoor installations
- High durability and minimal maintenance required

These systems are ideal for stadiums, industrial plants, transport hubs, and other high-security environments.
